2. Section 68 of the Indian Railways Act, 1890 (hereinafter referred to as the said Act), shall be renumbered as sub-section (*1*) of that section and to the section as so re-numbered the following sub-section shall be added, namely:— IX of 1890.

"(*2*) A railway servant when granting the permission referred to in sub-section (*1*) may, if empowered in this behalf by the railway administration, grant to the passenger a certificate that the passenger has been permitted to travel in such carriage upon condition that he subsequently pays the fare payable for the distance to be travelled."

Substitution of new section for section 112, Act IX of 1890.

3. For section 112 of the said Act the following section shall be substituted, namely:—

Travelling or attempting to travel without proper pass or ticket.

"112. (*1*) If a person enters in contravention of section 68 any carriage on a railway, he shall, unless he satisfies the Court that he had no intention to defraud the railway administration, be punished with imprisonment which may extend to two months, or with fine which may extend to one hundred rupees in addition to the amount of the single fare for any distance he may have travelled.

(*2*) If a person uses or attempts to use a single pass or single ticket which has already been used on a previous journey, or, in the case of a return ticket, a half thereof which has already been so used, he shall be punished with imprisonment which may extend to two months, or with fine which may extend to one hundred rupees in addition to the amount of the single fare for any distance he may have travelled.

(*3*) Any railway servant authorised by the railway administration in this behalf or any other person whom such railway servant may call to his aid may remove from a carriage a person found travelling therein without having a proper pass or ticket with him, unless he then and there pays the fare and the excess charge which he is liable to pay under the provisions of section 113."

Amendment of section 113, Act IX of 1890.

4. In section 113 of the said Act,—

(*a*) to sub-section (*2*) the following proviso shall be added, namely:—

"Provided that the excess charge referred to in sub-section (*1*) and this sub-section shall not be payable if the passenger has with him a certificate issued under sub-section (*2*) of section 68.";

and

(*b*) after sub-section (*4*) the following sub-section shall be added, namely:—

"(*5*) An application made under sub-section (*4*) shall contain a statement, certified as correct by the railway servant, of the sum payable by the passenger, and such statement shall, unless the contrary is proved, be proof that the sum so stated is recoverable from the passenger."

Amendment of section 131, Act IX of 1890.

5. In section 131 of the said Act,—

(*a*) in sub-section (*1*), after the figures "101" the figures "112" shall be inserted, and after the word, brackets and figure " sub-section (*1*)" the following words shall be inserted, namely:—

"or if a person fails or refuses to pay any excess charge or other sum demanded under section 113 and there are reasonable grounds for believing that except by his arrest he cannot be placed before a Magistrate without undue delay, trouble or expense,";

and

(*b*) to sub-section (*2*) the following words shall be added, namely:—

"or, in the case of a person arrested on failure to satisfy a demand made under section 113, before the Magistrate to whom the application under sub-section (*4*) of section 113 is to be made".

Amendment of section 132, Act IX of 1890.

6. In sub-section (*1*) of section 132 of the said Act the words "or fails or refuses to pay any excess charge or other sum demanded under section 113" shall be omitted.

STATEMENT OF OBJECTS AND REASONS.

The Bill is intended to permit of more effective and deterrent action being taken than is possible under the existing law when persons are found travelling by railway without proper tickets. Although Railways have provided an elaborate and expensive organisation for the check of tickets both at stations and in trains, the number of cases detected of passengers travelling without proper tickets has tended to increase, and the amount recovered from them approximates to the amount spent on the organisation for check in trains. Experience has shown that any expenditure incurred on additional checks by the appointment of more travelling ticket checkers results in an increase of revenue proportionate to the increased expenditure. This indicates to some extent the seriousness of the evil which, it has been estimated, causes a loss of about 50 lakhs annually.

2. The sections of the Act under which action can be taken at present are 112 and 113. The former refers to cases in which there is intent to defraud a Railway and the latter to cases where there is no such intent. In cases in which action is taken under section 112 the onus of proving intent to defraud rests on the railway staff, the discharge of which is not always practicable. It is proposed, therefore, that the onus of proving that there was no intent to defraud should rest on the person

found travelling without a proper ticket. The penalty of a fine extending to Rs. 100 prescribed under section 112 has proved, in practice, to be ineffective and the Bill therefore provides for a sentence of imprisonment to be inflicted.

3. Most cases in which passengers found travelling without proper tickets are, however, dealt with under section 113 under which a passenger is liable to pay in addition to the fare due an excess charge equal to the amount of the fare but not exceeding the maxima provided in section 113, sub-section (*3*). The maximum excess charge in the case of a third class passenger is one rupee when he is detected before he has notified his liability, and two annas otherwise. A passenger who declines to pay the amount demanded can, under the present law, only be asked to give his name and address. If these are disbelieved, arrangements have to be made to hand the man over to the police to be placed before a magistrate. In many cases, such passengers are found to have no assets and are discharged. Where a distress warrant is issued against any person, the results are usually quite incommensurate with the time, trouble and expense involved in court proceedings, etc., as the amount payable is frequently not realised. To deal effectively with such cases, it is necessary that railway servants should be empowered to arrest such persons as refuse to pay the charges due if there is reason to believe that it will not be possible to get them to appear before a magistrate without undue delay, trouble or expense. Provision for this has been made in the proposed amendment to section 131 of the Act.

Resolution reviewing the reports on the working of municipalities in Bengal during 1933-34.

GOVERNMENT OF BENGAL.

Local Self-Government Department.

Local Self-Government (Municipalities).

CALCUTTA, THE 1ST MAY 1936.

RESOLUTION—No. 3062M.

Minister-in-charge: The Hon'ble Sir Bijoy Prasad Singh Roy, Kt.

The number of municipalities and revision of boundaries.—The number of municipalities remained unchanged at 117. There was no noticeable variation in actual limits of any municipality during the year. The boundaries of some of the townships in the district of the 24-Parganas were, however, revised mainly in order to correct discrepancies noticed during the recent survey and settlement operation between the notified boundaries of the municipalities and the boundaries of the areas actually administered.

Elections.—The first general elections under the provisions of the Bengal Municipal Act, 1932, were held in 50 municipalities. The general election which occurred in the hill municipality of Kurseong was under the old Act of 1884, as the new Act had yet to come into force in the district of Darjeeling. These elections did not pass without incidents. The general election of the small borough of Gobordanga had to be set aside on account of irregularities. Election in the South Suburban Municipality had to be postponed under special orders of Government on account of

defective procedure. The election of commissioners of the Chittagong Municipality had also to be put off on account of serious defects in the preparation of electoral rolls.

The elections showed, on the whole, a very keen interest on the part of the ratepayers in the exercise of municipal franchise. Polling was unnecessary only in two municipalities, namely, Barrackpore and Khardah, and in certain stray wards of other municipalities. Four wards sent over 90 per cent. of the voters to the polls while 38 wards spread over 20 municipalities polled 80 per cent. of the total number of voters. Only in two wards did the percentage fall below 50, the lowest being 45·1 in a ward in the Bhatpara Municipality. The Commissioner of the Rajshahi Division reports that there were no contests or only lukewarm contests in respect of seats reserved for the Muhammadan community.

Municipal meetings.—The total number of meetings held fell from 2,809 to 2,524. While the municipalities in the other divisions record slight increases in the number of meetings, those in the Burdwan Division convened only 348 meetings, as against 778 in the previous year. The Commissioner has found himself unable to find any reason for this very marked falling off in municipal activity; it will however be hardly fair to draw any moral as unnecessary multiplication of meetings far in excess of the statutory minimum of 12 is not always an indication of real interest in public affairs.

The small township of Bansberia in Hooghly continues to hold the largest number of meetings held by any municipality, while at the other extreme the two municipalities of Murshidabad and Netrokona held the smallest number of meetings.

The attendance of commissioners at meetings was on the whole fairly satisfactory. The average attendance in three municipalities exceeded 80 per cent., while in 16 others the percentage was over 70. In 15 municipalities only half the number of members failed to attend on an average.

Thirty out of the 40 meetings held by the municipality of Pirojpur had to be adjourned or failed for want of quorum. The municipality of Pabna which held 41 meetings had to put off 13 of them for one reason or another.

The number of adjourned meetings increased from 210 to 309 and the number of meetings which failed to do business for want of quorum also rose from 90 to 113.

Ratepayers and population.—The total number of ratepayers fell from 346,520 to 344,747, the ratio to total urban population, according to the census of 1931, being 15·01 against 15·09 in the preceding year. While slight increase in the number of ratepayers, and consequently in the percentage of ratepayers to population, is reported from the Burdwan and Presidency Divisions, the other three divisions record a falling-off. The decrease in the number of ratepayers in Jalpaiguri is reported to be due to the introduction for the first time of the rate on holdings under the Bengal Municipal Act, 1932, in lieu of the rate on persons. The percentage of ratepayers to population was highest at Kumarkhali (43·6 per cent.) and lowest at Bhatpara (3·2 per cent.).

As usual the mill municipalities of the Burdwan and Presidency Divisions constitute the majority of the townships in which rates are paid by less than a tenth of the population.

Rates and taxes.—The yield of rates and taxes rose from Rs. 68·81 lakhs to Rs. 71·16 lakhs. The incidence of taxation per head of the total municipal population was Rs. 3-1-2. In 1923-24, the incidence was Rs. 2-12-5. It rose gradually reaching the peak figure of Rs. 3-8-10 in 1929-30. Thence it fell gradually down to Rs. 2-15-11 in the year preceding that under review. There were large variations in the actual incidence of taxation in individual municipalities. Darjeeling, as usual, headed the list with an average of Rs. 13-0-6; the other hill municipality of Kurseong returned an average of Rs. 8-11-9. In the plains, Howrah returned the figure of Rs. 7-10-4 followed by Dum Dum with Rs. 6-13-10. At the other end can be cited the petty borough of Sonamukhi with an average of Re. 0-9-9 and Debhatta which taxed its residents to the extent of only Re. 0-5-7 per head.

Revision of assessment was made in a number of municipalities with mixed results. In Howrah, a consolidated rate was levied under the provisions of the Calcutta Municipal Act as extended to this municipality. The tax on persons was replaced by a rate on holdings according to the provisions of the

New Municipal Act in Kotchandpur, Barisal, Jalpaiguri and Bogra. The result in the last two municipalities was a marked loss of income. The general revision of assessment in certain other municipalities produced notable gains. Bankura added Rs. 17,964 to its income followed by Midnapore with Rs. 8,103. By imposition of a conservancy rate, Bally made an increased income of Rs. 13,032. Addition of Rs. 11,775 to the municipal revenue of Bhatpara was due to the full benefit of the lighting tax imposed in the latter half of the preceding year.

Partial revision of assessment accounted for an increase of Rs. 13,096 in Dacca. In Comilla, however, such partial revision resulted in a loss of Rs. 6,143 attributed to fall in the value of holdings owing to economic distress.

Collections.—Some improvement was noticeable in the matter of collection of dues by municipalities. The total collection increased from Rs. 66·65 lakhs to Rs. 69·28 lakhs; the percentage of collections to current demand also rose from 88·8 to 92·8. The accumulated arrears of past years, however, take away from the value of this improvement. The increased income was shared by all divisions, the increase in the municipalities of the Burdwan Division (Rs. 124 lakhs) being most marked. The number of boards which collected more than 100 per cent. of their demand was 18 while the percentage fell below 80 in 13 municipalities.

The small municipality of Sherpur collected 131·1 per cent. of its demand, being followed by Bajitpur (120·4 per cent.) and the small borough of Old Malda (118·3 per cent.).

Among the larger municipalities, Dacca with a percentage of 110·9 holds pride of place. Asansol, English Bazar and Kurseong also shared the distinction of collecting 100 per cent. and over.

The mill municipality of Garulia as in the previous year collected the whole demand and left no outstanding balance.

The record is marked by lamentable failures in many other towns. Noakhali collected no more than 68·4 per cent. of the current demand. Among those townships which showed noticeable deterioration were Rangpur, Rajshahi and Comilla.

Various excuses are put forward on behalf of municipalities for bad collections. Satisfactory collection in a number of municipalities furnishes the strongest refutation of these excuses. The total remission of rates, arrear and current, rose by nearly half a lakh to Rs. 5·1 lakhs. The percentage of remissions on the current demand for the whole province was 6·8 against 6·2 in 1932-33 and 6·0 in 1931-32. Large remissions were granted by Howrah (Rs. 1,66,197), Dacca (Rs. 38,947), Bally (Rs. 13,671), and Bankura (Rs. 11,803); a few others also exceeded the ten thousand mark. The ratio of total remissions to current demand varied largely. The municipality of Rajpur remitted more than one-third of its current demand; Serajganj with its record of remissions ran it close with a percentage of 30·7. The small municipality of Debhatta wrote off one-fifth of the demand and the remissions in Chandrakona, Sherpur (Mymensingh), Kotchandpur and Satkhira amounted to considerably more than one-fourth. On the other hand, Garulia made no remissions and the municipalities of Meherpur and Joynagar remitted less than 1 per cent. The wastage of municipal revenues which these figures of remissions indicate is obvious particularly as remissions have been reported to be not infrequently made on flimsy or inadequate grounds.

The outstanding balances increased from Rs. 28·53 lakhs to Rs. 28·82 lakhs. The only municipalities which showed no outstanding balance were Garulia, Bhadreswar and Dhulian. Baraset, on the other hand, had outstanding arrears which exceeded the amount of its current demand. Panihati closed the year with arrears representing 95 per cent. of its current demand after remission of more than 16 per cent. of the demand. Rangpur carried over Rs. 60,402 or 91·29 per cent. of the annual demand. The Howrah Municipality, as usual, had the largest outstanding balance, namely, Rs. 9,14,277. Next comes Dacca with Rs. 1,83,695. Arrears in Mymensingh and Chinsura also exceeded Rs. 1 lakh. A list of all the municipalities which had undoubtedly large balances would be too heavy for inclusion in this review. Accumulation of these heavy balances can only be partially attributed to the continued economic depression and is often due to inefficiency in collection.

Income and expenditure.—The total receipts, with the opening balances, amounted to Rs. 114·9 lakhs against Rs. 112·9 lakhs in the preceding year, the increase occurring mainly under the head "Municipal rates and taxes". The total Municipal expenditure also rose from Rs. 99·7 lakhs to Rs. 101·6 lakhs, the increase being distributed over the heads "Public instruction" and "Miscellaneous". The aggregate balance to the credit of the municipalities at the close of the year was Rs. 13·29 lakhs as against Rs. 13·24 lakhs in the previous year. Conspicuously large balances were held by Darjeeling (Rs. 1,51,770), Dacca (Rs. 1,48,740), Baranagar (Rs. 58,995), Burdwan (Rs. 56,352), Budge-Budge (Rs. 49,155), South Dum-Dum (Rs. 26,957), Bhatpara (Rs. 26,415) and Khulna (Rs. 23,121). Baranagar has the bulk of the balance earmarked for its water-supply scheme while the balances nursed by the latter four municipalities are really funds set apart for town improvement. Numerous municipal bodies failed to keep the minimum working balances, and a number ended with little or nothing in hand. For instance, Sonamukhi closed the year with Rs. 3 in its till. Bhola had Rs. 66 only left while several others had equally insignificant reserves. A very disquieting feature is that the outstanding liabilities of a large number of these townships far exceeded the closing balances, which would have been wiped out in some cases several times over had any attempt been made to meet these debts. Baraset closed the year with a few hundred rupees while its liabilities amounted to 78·1 per cent. of its current hundred rupees while its liabilities demand. Several others had debts which exceeded or nearly equalled half of their demand.

Among the larger municipalities Mymensingh had a balance of Rs. 9,653 while its liabilities were as much as Rs. 62,518 or 45·17 per cent. of the annual demand. Dinajpur owed Rs. 21,243 on current bills but wound up the year with an actual balance of Rs. 7,923 only.

The financial difficulties of these boards are not due to capital outlay but to the tendency of recurring charges to exceed the recurring income while arrear bills are allowed to accumulate. The obvious remedy, as the Commissioner of the Rajshahi Division suggests, is to take stock of the position as regards outstandings at the time of framing the budget and make systematic provision for at least part payment of old debts and arrear bills even if this means drastic cuts in expenditure in other directions.

Education.—The educational expenditure including a Government subvention of Rs. 1·28 lakhs, rose from Rs. 5·25 lakhs to Rs. 5·53 lakhs. This general rise was shared by all divisions. The expenditure on primary education also showed a corresponding increase of about Rs. 21,000. The Howrah Municipality which is in a class of its own spent Rs. 67,686 on elementary education. Dacca spent Rs. 27,645 which included a contribution of Rs. 14,006 towards primary schools. The Narayanganj Municipality spent Rs. 16,442 for education and maintained a free public library and seven free primary schools. The marked increase in expenditure in Burdwan was due to a grant of Rs. 5,000 to the local municipal high school. Asansol paid a lump grant of Rs. 1,000 towards construction of buildings for primary schools.

The Rajshahi Municipality introduced a system of free primary education and opened two primary schools during the year.

The municipality of Naihati opened a municipal school for girls. The South Suburban Municipality made increased grants to primary schools and spent more on free primary schools.

The Chittagong Municipality the most progressive of all municipalities in the matter of education deserves separate and honourable mention. It spent 31·2 per cent. of its ordinary income on education. Out of an aggregate expenditure of Rs. 68,996 on education, the commissioners contributed Rs. 27,355 from their own fund. Primary education cost Rs. 39,408 of which Rs. 22,242 was spent by the municipality.

The scheme of the municipality for primary education for girls received the sanction of Government last year. Female education received, as the Commissioner puts it, such a powerful stimulus that the only high school for girls was unable to absorb the overflow and make-shift classes up to the Matriculation Standard had to be opened in two primary schools to accommodate the surplus.

On the whole elementary education, which is the concern of municipal bodies, received adequate attention. Only 5 municipalities (viz., Darjeeling,

Mymensingh, Uttarpara, Garulia and Dum-Dum) failed to achieve the minimum proportion of 3·2 per cent.

Water-supply.—The total expenditure on water-supply was Rs. 10·90 lakhs against Rs. 14·90 lakhs in 1932-33 showing a decrease of Rs. 4 lakhs.

These figures vary markedly as individual schemes are completed or accounted for. Adjustment of the advance made to the Public Health Department in Midnapore (Rs. 3·38 lakhs) accounts for the bulk of the decrease. Narayanganj also shared in the decrease to the extent of Rs. 34,252 having completed the waterworks on the east bank of the Lakhya in the previous year. The expenditure in Barisal was less by Rs. 15,761 owing to heavier payments made last year by way of adjustment of accounts with the Public Health Department. A number of municipalities in the Presidency Division increased their expenditure on water-supply mainly by sinking tube-wells.

The Tollygunge and South Suburban Municipalities continued to obtain supplies of filtered water from the Calcutta Corporation main at fixed charges; but the supplies being inadequate to meet the increasing demand, they had to be supplemented by tube-wells. In Bhatpara the water-supply scheme forms part of the town improvement scheme. Differences arising over the terms of agreement with the mill authorities about granting of private connections are reported to have been settled. The commissioners have also accepted Mr. Griffin's decentralised storage scheme. But the revised rules regarding private house connections are still to be adopted. A revised scheme for water-supply in Halishahar based on the assistance guaranteed by the authorities of the Hukum Chand Mills has been drawn up and is under consideration.

The Baranagar Jute Mills supply filtered water to a part of the town of Baranagar. This supply being insufficient tube-wells have been sunk in different parts of the town. This municipality has under examination an independent water-supply scheme.

The Dacca waterworks with 51 miles of pipe line supplied 16 gallons per day per head of population. There was an increase in the number of street hydrants and private house connections. At Narayangunj, while the new waterworks solved the problem of water-supply on the east bank, the whole scheme of improvement of the west bank could not be taken up for want of funds; a part of the scheme has however been completed. A scheme for the improvement of Mymensingh waterworks is under detailed examination by Government.

The Chandpur Municipality submitted a project for improvement of the waterworks in a section of the town but failed to obtain administrative approval of Government owing to defects in the scheme.

The scheme for Jalpaiguri (Mr. Griffin's decentralised storage scheme) was under execution and made considerable progress under the supervision of the Public Health Department. The Electric Company which is to supply the power failed however to keep pace but has made up lost ground since the close of the year. Pipe laying and erection of distributing tanks were nearly completed in the main streets. Government paid their subsidy and the district board will complete their quota during the current year. A loan of Rs. 20,000 is under notification.

The Rajshahi waterworks scheme made little headway. The principal donor, Maharani Hemanta Kumari of Puthia, being unable to contribute the balance of the promised contribution, has entered into an arrangement to pay an annual contribution of Rs. 5,000 agreeing to increase the payment as soon as the economic depression lifts.

The scheme for pipe water-supply at Pabna also remained at a standstill as the zemindars of Taras who had promised a contribution of half a lakh expressed their inability to pay anything for the present. The Public Health Department has since drawn up a reduced scheme estimated to cost Rs. 83,000. The finances of the municipality are in too unsatisfactory a state to make the project of a loan from Government or in the open market feasible.

A scheme for improvement of water-supply of the Dow Hill area in the Kurseong Municipality has been prepared by the Public Health Department at an estimated cost of Rs. 12,000. It is now under the consideration of the commissioners.

The waterworks in all municipalities worked satisfactorily on the whole. Frequent inspections were held by the

Chief Engineer and his staff. The water was subjected to frequent analysis and invariably found safe for drinking.

The water-supply at places other than those at which there is pipe water-supply is by means of masonry wells, tube-wells and tanks. Several municipalities sank small tube-wells and constructed masonry wells to improve their water-supply.

Conservancy and drainage.—The total expenditure on conservancy rose from Rs. 22·64 lakhs to Rs. 28·99 lakhs and exceeded the receipts on this account by Rs. 14·26 lakhs. The deficit was met as usual from the general fund by most municipal bodies which appear generally to shirk any serious effort to make these special funds self-supporting by raising the rates or cutting down expenditure. There is however this much to be said for them that while the old latrine fees bore only the charges for cleansing the private privies and cesspools, the rest of the expenditure for conservancy being met from the general fund, the consolidated rate has now to defray all expenses of cleansing latrines, urinals and cesspools as well as those of general conservancy. It is also a fact that in most municipalities the arrangements for conservancy cannot by any means be said to be lavish or even moderately satisfactory.

Nevertheless the conservancy rates have been pitched unduly low in many cases and the commissioners should not hesitate to increase the rates whenever possible even up to the maximum limit in order to prevent the drain on the general funds which involves sacrifice of other vital services.

The largest increase in expenditure occurred in Bhatpara (Rs. 6,35,565), but this was due to transfer of drainage charges to this head. Titagarh, on the other hand, showed a decrease of Rs. 12,316 owing to larger expenditure incurred during the previous year for the sewerage extension scheme. In the Burdwan Division there was a decrease in expenditure amounting to Rs. 30,765 which was mainly due to economy and retrenchment by some municipalities. There were however increases in expenditure in Baidyabati and Uttarpara Municipalities due to extension of conservancy provisions throughout the municipal area. Bally purchased more carts and cattle during the year. No satisfactory explanation has been furnished for the heavy increase of Rs. 20,784 in Dacca. The payment of arrear bills of fodder, purchase of a motor lorry and making of additional arrangements for the removal of night-soil from the Military Camp were responsible for an increase of Rs. 7,849 in Mymensingh. The expenditure rose by Rs. 2,530 in Barisal due to the purchase of a new motor lorry for watering the streets. On the other hand, the decrease of Rs. 3,081 in Faridpur was due to the fact that some bills could not be paid for want of funds. In Chittagong the contract system of removal of night-soil by bullock carts worked satisfactorily. Two motor lorries also on contract system were engaged for the removal of town refuse at a cost of Rs. 8,500 per annum. This municipality also reconstructed a public latrine on sanitary lines and metalled a portion of the road leading to the trenching ground. The Darjeeling Municipality spent Rs. 7,187 more than in the previous year on original conservancy works. Road-watering by motor lorry was in vogue in the Rangpur and Jalpaiguri Municipalities and the municipality of Dinajpur sank a number of shallow tube-wells for road-watering purposes. The township of Malda still continued without a latrine system although it had passed long ago a resolution to introduce latrines.

The reports of public health experts of Government indicate that in most municipalities conservancy work is far from efficient. The trenching grounds are either insufficient or sewage sick. The provision for night-soil depots is unsatisfactory and inadequate. The methar service is also said to be far from adequate for the needs of these towns. The methar problem is difficult to solve, the supply being unequal to the demand. Besides, this monopolist labour is hardly tractable. But other improvements in order to remedy the present unwholesome state of things and to increase sanitary amenities can be effected without difficulty.

Drainage.—The total expenditure on drainage fell from Rs. 7·09 lakhs to Rs. 3·27 lakhs. Of this decrease Bhatpara alone accounts for Rs. 3,31,760. The reason given is that the charges on account of drainage were debited to the conservancy rate fund and figured under head "Conservancy." This decrease was therefore rather apparent than real. As the Commissioner has pointed out separate account should have been kept

for purposes of statistics. Naihati showed a marked decline in expenditure as it had constructed extensive drains in the preceding year. Payment of an outstanding bill and arrangement for flushing drains in the previous year are ascribed as the reasons for the big fall in expenditure on drainage in the Suri Municipality. Noticeable increases occurred in Krishnagar, which extended its drainage to another ward, and in Ranaghat, which built pucca drains. The increase of Rs. 7,589 in Dacca is attributed to the payment of outstanding bills and construction of some drains. While all divisions shared the decrease in expenditure Rajshahi alone showed a small increase on its generally small outlay.

Nothing was however done towards carrying out any of the large schemes which some of the important municipalities have had in view for some time.

The drainage scheme for Dinajpur remains where it was. The latest reduced scheme is roughly estimated to cost slightly over a lakh. The commissioners of this municipality in which the drainage has been described by Mr. Robertson as a blot on civilisation declared themselves unable to bear any share of the cost and asked Government to make a gift of the whole cost of the scheme.

The English Bazar Municipality has practically abandoned the project for improvement of drainage owing to lack of funds. Lack of resources no doubt stands in the way of ambitious schemes of drainage in most municipalities, but as pointed out by the Commissioner of the Rajshahi Division the commissioners and executives of municipalities would be well advised to pay greater attention to small remedial measures involving only moderate outlay and not much skilled supervision which would improve the public health and amenities of the town much more than other more spectacular schemes. What is needed chiefly in the rural municipalities is not the substitution of pucca for kutcha drains but a careful taking of levels with a view to preventing drains becoming waterlogged.

Lighting.—The expenditure under this head amounted to Rs. 6,90,335 against Rs. 7,03,308 in the previous year. Increases of expenditure in Bally (Rs. 4,504) and Asansol (Rs. 1,463) were due to electric lighting, while in Hooghly-Chinsura and Serampore they were due to the payment of pending bills. Darjeeling is the only municipality which holds its own licence. The new 3 phase 50 cycle supply is reported to have led to decided improvement and attracted industrial loads. Works of further improvement have also been taken up and are progressing rapidly. Electric lighting was extended in the Kurseong Municipality and this is reported to have resulted in a great improvement in the amenities of the town. The electrification of Jalpaiguri is making good progress and is reported to be nearing completion. The principal streets of Rangpur continued to be lit by electric lights, there being kerosene lights, in lanes and by-lanes. There is electric lighting in the centre of Serajgunj town, but the prospects of the private company are reported to be far from satisfactory owing to dearth of private custom. At Pabna the prospect of electrification of the town had made no headway since the licensee became bankrupt. Khulna has a scheme of electrification in hand. The Dacca Municipality increased its electric lights from 807 to 926. The Chittagong Municipality also added to its electric lights. Lighting arrangements continued to be unsatisfactory in some important parts of the town of Comilla.

Public health.—The municipal bodies gave increasing attention to the important municipal duty of taking suitable measures for the improvement of public health especially for preventing and controlling epidemics. Most towns returned a fairly clean bill of health.

Epidemics of smallpox, generally mild, are reported to have broken out in a few towns and the municipalities claim to have checked them by prompt and adequate measures. The epidemic was however severe in Bogra and the district board had to come to the aid of the municipality, practically taking over the work of fighting the epidemic.

Vaccination and revaccination were carried out systematically and measures were taken by most municipalities to vaccinate and revaccinate children. Free home vaccination was resorted to by a large number of municipalities in the 24-Parganas most of which employed permanent vaccinators. A few municipalities employed female vaccinators for purdah ladies. Temporary vaccinators were also employed by some municipalities when occasion demanded.

As regards malaria and kala-azar, there are reports from all parts of the province of activity in filling up insanitary tanks, cutting down jungles and kerosinising of ditches, pools and tanks. The wider powers conferred by the new Act on municipalities in this direction were brought into use by several bodies with more or less satisfactory results. Measures were also taken by several municipalities of which Jessore deserves special mention in eradicating water-hyacinth. In the Presidency Division the anti-malarial societies did excellent work in co-operation with local municipalities. The Palli Mandali of Birnagar undertook preventive and curative schemes against malaria as in previous years with the co-operation of the local municipality and with financial assistance from Government.

Berhampore continued to maintain one leprosy and two kala-azar centres for free treatment of patients and the leprosy clinics at Krishnagar and Nabadwip were fairly well attended. The Dacca and Chittagong Municipalities also started free leprosy treatment centres.

The Nabadwip Municipality by opening a maternity home and orphanage in connection with the local Lodging House Committee continued to do useful work. Training classes for dais were maintained at Krishnagar and Nabadwip.

The Burdwan Municipality organised a Baby Show with the help of the district board and also held a Health Welfare Exhibition. The municipality of Kurseong started a health association for health education and propaganda among the ratepayers. The town has been divided into 13 groups, each group being placed under the control of an honorary organiser. The municipal Sanitary Inspector visits each group by turn and hold talks by means of charts and posters and distributes leaflets. This example may be profitably followed in the larger plains municipalities.

There were 68 prosecutions under the Food Adulteration Act in the Presidency Division of which 66 ended in conviction, while in the Dacca Municipality alone 393 prosecutions were instituted. Eighty-seven prosecutions were instituted in that town against vendors for exposing food-stuffs of con tamination by dust and insects. In Chittagong there was a noticeable improvement in the quality of food-stuffs as a result of strict administration of the Food Adulteration Act. Varying interest in this respect was displayed by the municipalities in the Rajshahi Division where the number of prosecutions totalled 73 of which 71 ended in conviction. Darjeeling Municipality instituted 34 cases. The small municipality of Gaibandha prosecuted 18 cases while Rangpur and Jalpaiguri had only 6 cases each to their credit. The above record shows, with few exceptions, half-hearted work in place of an unrelenting drive against adulteration of food-stuffs.

Public works.—Expenditure on public works which had shown a slight rise in the previous year increased from Rs. 10·40 lakhs to Rs. 11·75 lakhs. The local bodies were allotted shares from the proceeds of the Motor Vehicles Tax for the first time during the year, to supplement their normal expenditure on roads.

The shares were calculated on the basis of metalled and unmetalled roads within each municipality adhering at the same time to a fixed ratio of distribution between municipalities and district boards. Individual shares varied from Rs. 25,000 given to Howrah in the shape of a special grant, to Rs. 100 in respect of the smallest municipal bodies. A not inconsiderable amount in the aggregate was however made available for improvement of roads and this addition to the receipts explains the bulk of the increased expenditure during the year.

The municipality of Dacca spent Rs. 46,906 more than in the preceding year aided by a grant of Rs. 11,438 from the Motor Vehicles Tax Fund and a further subsidy of Rs 6,000 for tarmacadamising the roads in the residential area of Purana Paltan Khasmahal.

Tollygunj and Baranagore, the two important suburban municipalities, assisted by the auxiliary grant from the Motor Vehicles Tax Fund paid more attention to communications which had been allowed to deteriorate. Payment of outstanding bills accounted for an increase of Rs. 9,251 in Comilla. The large increase in expenditure under this head in Chandpur (Rs. 12,613) was owing to adjustment of advance for land acquisition and thorough repairs of metalled roads and metalling of earth roads.

The Darjeeling Municipality spent a large amount on painting its roads. Jalpaiguri tarred and shingled the principal roads of the town. Rajshahi

treated some of its roads with bituminous emulsion. Dinajpur took up a programme of colfixing some of its principal streets.

Noticeable increase in expenditure on buildings occurred only in South Suburban Municipality which built a new municipal office.

Audit.—The Accountant-General's Local Audit Department audited during the year under review the accounts of all municipalities in the Presidency with the exception of 5, viz., Debhatta, Netrokona, Kishoregunj, Noakhali and Faridpur.

There was the usual crop of embezzlements or defalcations. In South Suburban Municipality a collecting sircar misappropriated Rs. 10,000 and was convicted on trial.

Two cases of embezzlement by collecting sircars were discovered in Dacca. In one case the amount was recovered and the offender dismissed. In the other the culprit has been suspended and attempts are being made to realise the money. At Khirpai, a case of temporary embezzlement was detected in audit. The tax daroga and the accountant were fined. At Vishnupur, an embezzlement of a petty sum was discovered and the prosecution ended in conviction.

The embezzlement case in Netrokona reported last year is still proceeding.

The case of defalcation at Sirajgunj is interesting. The *modus operandi* adopted was to issue receipts to ratepayers for the correct amount but to write up the carbon copy by a clever manipulation showing a realisation of a much smaller amount due from a different ratepayer who may not have paid anything at all. The realisations of subsequent quarters were also shown as pertaining to the immediately preceding quarters in the carbon copy by some sort of ingenious adjustment. Similar defalcation by the same method has been committed by two sircars only a few years ago.

There was a serious case of theft in the Darjeeling Municipality. The office of the Market Superintendent was broken into and a fairly large sum of money, viz., Rs. 1,144-11, being collections from the market, stolen. There was, it appeared, no arrangement for guarding the office. The amount has been written off. Arrangements have since been made for daily remittances to the bank or the central office and for better custody of the market safe.

The audit notes, while they show considerable variations in the efficiency of different municipal offices, repeat the same story of easily remediable defects and irregularities from year to year.

The value of these audit notes, which serve to show up the slack and weak points of administration and often indicates the line of improvement, can hardly be said to be appreciated by most municipalities. On the other hand their indifference to accounts is illustrated by the chronic delay in dealing with these audit reports.

The machinery for accounting and financial control is below the normal standard in most of these local bodies. Considering the simple nature of municipal accounts, the carefully prepared account rules and the system of regular audits, there is no reason why improvement in this respect should not be possible by means of regular and careful supervision.

General remarks.—The first chapter of municipal history under the Bengal Municipal Act of 1932 has but barely commenced, the year under review being the first complete year in which municipal bodies worked under the new Act. As was natural in such a large piece of legislation, points of varied importance calling for adjustment or interpretation presented themselves. An urgently needed amendment regarding the franchise was put through during the year.

The boards are passing through difficult times. Finance is the greatest obstacle which lies in their path, and lack of funds has prevented, with few exceptions, any striking advance in the activities of municipalities.

Government, while appreciating that the routine administration of the municipalities has been carried on fairly well, view with some apprehension the reports of the local officers commenting on the reluctance of the municipal authorities to undertake unpopular duties such as necessary increase in taxation, on the prevailing neglect of rules and canons of finance, and on the failure of a very large number of these bodies to recover taxes and arrears or to meet outstanding debts.

It was considered inevitably necessary to assume control of the budget in some municipalities and to take over collection and assessment departments in a few others. Warnings had also to be administered to some other municipalities that Government would be compelled to have recourse to supersession unless

they put their affairs in order within a given time. While Government are naturally reluctant to interfere in the internal adminstration of these self-governing bodies, they have a definite responsibility in the matter and cannot but step in in case of continued and serious maladministration

DARJEELING, THE 1ST MAY 1936.

RESOLUTION—No. 90T.A.I.

Minister-in-charge: The Hon'ble Nawab Sir Mohiuddin Faroqui, Kt., of Ratanpur.

Read—

Annual Reports of the Civil Veterinary Department, Bengal, and of the Bengal Veterinary College for the year 1934-35.

I. Civil Veterinary Department.

The year under review was one of the cyclic years in which the incidence of mortality of cattle from epidemic diseases was high. Rinderpest alone was responsible for 18,513 deaths, the number of outbreaks being 732. The disease was fairly widespread in North and West Bengal while with the exception of Bakarganj, East Bengal was practically free. There was also a substantial increase in the death rate from Anthrax, the number being 1,437 against 329 in the year 1933-34.

The usual programme of preventive inoculation was carried out in 890 outbreaks and about 2 lakhs animals were inoculated with satisfactory results; the death rate among the protected animals being as low as 0·82 per cent. for the whole province.

The striking results which have been obtained by the substitution of the Goat Tissue Vaccine method for the "Serum alone" method have proved beyond doubt that this method is the most effective for a campaign against Rinderpest. The Vaccine Depot which was started temporarily in 1933 was continued throughout the year. It is hoped that with the establishment of the depot on a permanent and organised basis, it will be possible to ensure an unfailing supply of Goat Tissue Vaccine, which is gaining in popularity amongst the cattle owners.

In addition to the inoculations carried out during the year, the veterinary assistant surgeons working in the mufassal visited 17,600 villages and treated 153,780 cases against 16,068 and 152,673 in the preceding year.

During the year under review 4,604 scrub bulls unsuitable for breeding purposes were castrated against 3,193 in the previous year. The increase in the number is an indication of the interest taken by the people in the improvement of their stock of cattle.

His Excellency acting with the Minister-in-charge notices with pleasure the names of officers of the department who did good work during the year and desires to acknowledge the efficient way in which Mr. Kerr and Khan Sahib S. S. Ahmad discharged their duties.

II. Bengal Veterinary College.

The popularity of this College which is the only institution in Bengal for the training of veterinary practitioners continued unabated as can be seen from the increasing demand for admission into the College. The number of students on the rolls at the beginning of the session was 203 of whom 170 prolonged their studies throughout the session, the number for Bengal being 66 against 60 in the year 1933-34. The results of the diploma and annual examinations were satisfactory.

The Governor acting with the Minister-in-charge is pleased to acknowledge the services rendered by Mr. MacGregor in the administration of the College and notes with pleasure the names of members of the College staff who did good work during the year. His thanks are also due to the non-official members of the Committee of Management for the services rendered by them.

Resolution on the Report of the Committee appointed to enquire into the charges for electrical energy levied by the Calcutta Electric Supply Corporation, Limited.

GOVERNMENT OF BENGAL.

Commerce Department.

CALCUTTA, THE 4TH MAY 1936.

RESOLUTION—No. 3345 Com.

Read—

Report of the Committee appointed to enquire into the charges for electrical energy levied by the Calcutta Electric Supply Corporation, Limited.

In its resolution No. 7760Com., dated the 26th July 1935, the Government of Bengal appointed a Committee to enquire into and to advise Government on the question of the charges levied by the Calcutta Electric Supply Corporation, Limited, for electrical energy.

The report of the Committee has been printed and is now obtainable from the Superintendent, Government Printing, Bengal Government Press, Alipore.

2. The Governor in Council desires to record his appreciation of the care and thoroughness with which the Committee has conducted its investigation.

3. The conclusions of the Committee regarding the charges levied by the Company in connection with supplies of electrical energy to consumers are summarised in Chapter VII of the report. For the information of those to whom the report of the Committee is not immediately available the summary of the Committee's conclusions is reproduced below:—

(1) The present charges levied by the Company for energy supplied to large industrial power users are controlled by competition and we have no proposals to make in regard to these charges.

(2) The nett charge for energy supplied for domestic purposes, for lights, fans, house service pump motors and lifts should be reduced from 2·5 annas to 2 annas per unit.

(3) The nett charge for energy for heating, cooking and refrigeration and all domestic purposes other than lights, fans, house service pumps and lifts should be reduced from 1 anna to 0·75 anna per unit.

(4) The charges for energy supplied for advertising signs, theatres and cinemas are related to the charges for domestic supplies and adjustments may be necessary if reductions are made in the charges for domestic supplies.

(5) The charge for energy for battery charging should be reduced from 1·25 annas to 1 anna per unit.

(6) Reductions in the charge for energy supplied under special agreements and for public lighting will follow the reductions proposed in the charges for domestic supplies.

(7) The present scale of rebate or discount allowed by the Company should be revised and so adjusted that the difference between the nett and gross rates does not exceed 10 per cent. approximately.

(8) The present minimum charge of Rs. 1-8 per month should be reduced to 12 annas per month if it is not possible to abolish the charge altogether.

(9) The charges levied for energy supplied to small industrial power users should be reduced. The revision which the Company propose to make in the rate applicable to this class of consumers will reduce the average charge to 1 anna per unit.

(10) The possibility of making some reductions in the cost of service connections should be considered by the Company.

(11) The monthly hire charge for ordinary consumers' meters should be reduced from 8 annas to 4 annas, but higher charges may be made for exceptionally expensive meters.

(12) We are of opinion that the reduction in the rates and charges which we have summarised above can be made at once and for the reasons given in our report, we consider that further reductions will be possible in the near future.

4. Advance proof copies of the report were forwarded to the Company with the request that Government might be informed to what extent the Company were prepared to give effect to the reductions recommended by the Committee. A memorandum containing the observations of the Board of Directors of the Company has been received by air-mail and is published as an annexure to this resolution.

5. It will be seen that the Company propose to give immediate effect to the following reductions:—

(1) The nett charge for energy supplied for domestic purposes, for lights, fans, house service pump motors and lifts will be reduced from 2·5 annas to 2·25 annas a unit.

(2) There will be a corresponding reduction in the charges for energy supplied for advertising signs, theatres and cinemas.

(3) The charge for energy for battery charging will be reduced from 1·25 annas to 1 anna a unit.

(4) Reductions in the charges for energy supplied under special agreement and for public lighting will follow the change in the domestic rate.

(5) The present minimum charge of Rs. 1-8 per month will be abolished.

(6) The revised rate referred to in paragraph 97 of the Committee's report for small industrial power users will be introduced as soon as the maximum demand meters are available.

The estimated sacrifice of revenue entailed in the reductions detailed above amounts to nearly £150,000 a year against £225,000 that the Committee estimated as the total fall in revenue which would result from the complete acceptance of its proposals.

By order of the Governor in Council,

E. N. BLANDY,

Secretary to the Government of Bengal.

ANNEXURE.

Memorandum from the Board of the Calcutta Electric Supply Corporation, Limited.

I.—Introductory.

1. The Board of Directors of the Calcutta Electric Supply Corporation, Limited, in submitting the following observations on the report of the Committee which was appointed to enquire into the charges levied by the Company for electrical energy, desire in the first place to express their recognition of the care and thoroughness of the enquiry, and the ample opportunity which the Committee afforded to the representatives of the Company to explain the working of the Company and to deal with the outside evidence which the Committee received. It is a matter of much gratification to the Board that the Committee has recorded so favourable a verdict on the conduct and methods of the Company's business, and particularly that it has rejected many irresponsible and unfounded charges which had been brought against the Company. In addition to dealing with the main question referred to them, viz., the charges levied by the Company for the supply of electrical energy, the Committee has made a number of suggestions for the future administration of the Company's business. Some of these have already been engaging the attention of the Board; others will demand and receive examination. The Directors will not delay their reply for a full examination of all the suggestions and criticisms made by the Committee, but submit at once this expression of opinion on their conclusions with regard to the charges levied by the Company. The present memorandum is accordingly confined to the question of those charges, including all matters which have a bearing thereon.

2. The kernel of the problem which was before the Committee was the propriety or otherwise of the net flat rate charged to domestic consumers. The present domestic flat rate of 2½ annas per unit was attacked in evidence before the Committee as excessive. The contention of the Company on the other hand was that, whether intrinsically or in comparison with other similar undertakings anywhere, the rate is extremely moderate. The Committee apparently concurred in the view that the rate is moderate, but they held that on the normal profits of the Company calculated on the basis of the 1934 accounts, there is room for further reduction, and they recommended that the domestic flat rate should be reduced at once to 2 annas per unit.

3. As a general comment on this conclusion, the Board wish to make their position clear. It has been their continuous policy to reduce their charges concurrently with the growth of the business; ample evidence of this can be seen in the past history of the Company. Before any question of an enquiry arose, three lines of advance in this direction were engaging the consideration of the Board. Along one of these lines indeed a distinct advance had already been made. The Board had submitted for the sanction of the Government, a proposal for the revision of the tariff applicable to the industrialist who uses electrical energy of low or medium pressure (Rate "E" in the Company's Rate Book). The Board subsequently extended the scope of this proposal to cover concerns operating under Rate "D". They are glad to note that the Committee has endorsed these proposals and accepted them as a sufficient and satisfactory measure of relief in the case of the smaller industries. As the majority of possible consumers of this class are already connected to the Company's system, it will be recognised that the measure entails a considerable sacrifice of revenue.

4. The second line of advance has reference to the domestic flat rate. Although this had been reduced from 2¾ annas to 2½ annas per unit on the 1st January 1935, it had become evident that, by reason of the great increase in the industrial high tension load, a further reduction was in sight. Had it not been for the appointment of the Committee of Enquiry, which naturally precluded any changes in the Company's tariff, this reduction would have been made before now. The third measure centred round the establishment of a new super-station at Mulajore. With a reduction of the high tension rates (Rate "A" in the Company's Rate Book) which are now being considered, the Company looks forward to an expansion of its business with a large increase in output, all of which would tend to the lowering of the domestic rate. The question of the high tension rates will be referred to again later in this memorandum. Meanwhile, the Government will observe that the Company has been mindful of the interests of all its consumers. Cheaper electricity to the industries, both great and small, on which the prosperity of Calcutta depends, is as much a service to the community as a small concession in the price of the domestic supply. And the more the industrial load develops, the greater is its contribution towards the cheapening of the domestic supply.

II.—The Committee's Recommendations.

5. The Committee has taken a somewhat different view, both of the Board's duty and of the public interest, and its method of approaching the question is as follows. In the first place, it establishes a figure of immediate surplus profits such as would, in its opinion, justify a reduction in charges by approximately £225,000 a year, as

compared with the tariff of 1934 (when the flat rate was still 2¾ annas). In the second place, the Committee advises that this reduction should be devoted exclusively, though in various forms, to the relief of the domestic consumer and the small power user.

6. In working out what it considers ought to be the annual profits of the Company on the present tariffs, the Committee takes the actual accounts of 1934, and makes a number of alterations which will be examined in some detail below. It then assesses the yield which it considers the Company may fairly expect on the capital sunk in the business: and by whatever amount its notional figure of profits exceeds this figure, it regards that amount as a surplus which can and should be returned to the consumer by reductions in the charges. The theoretical yield which the Committee considers fair is 7 per cent. on the net capital (paragraph 78); and the net capital it takes as being equivalent to the fixed assets of the Company, less its depreciation account balances (paragraph 31), or approximately £4·6 millions. The considerations which led the Committee to adopt these figures are not stated. Based upon existing money rates—and seemingly this was the underlying consideration—there might be some justification for a ratio of 7 per cent. But it must not be overlooked that the bulk of the Company's capital was raised during the past 25 years at rates far in excess of those prevailing to-day. A rate suitable for a Company established under present day conditions is hardly suitable for a Company long established and developed under conditions materially different from those now obtaining. The Board are informed that, for electrical undertakings in England, 7 per cent. is an average normal figure, with 6 per cent. as the minimum. If allowance be made for the additional risks of an electrical undertaking in India, 9 per cent. is the lowest rate which could fairly be assumed in the case of this Company. (In the recent Lahore enquiry, it would appear that upon a calculation similar to that which is now being discussed, the ratio accepted as suitable was 7½ per cent. *free of income tax.*)

7. The second reason why the Directors cannot accept the calculation of the Committee is that a Company cannot live on its fixed assets alone. For the purposes of the calculation which the Committee had in mind, it is imperative to allow for working capital, debtors, stores, etc., as well as for sums raised in connexion with plans for early expansion of the business, and not yet invested in it. According to the Board's estimate, at least half a million sterling must be added for these purposes; and thus the fair return to which the Company considers itself entitled, is 9 per cent. on £5·1 millions and not 7 per cent. on £4·6 millions (paragraph 78), or nearer £460,000 than the £323,000 on which the Committee found its conclusions. The difference is serious and affects the whole argument; but the Board cannot conceive that the arbitrary pronouncement of the Committee and the summary and imperfect reasons in support of it in paragraph 78 will meet with the approval of the Government. Should the Government concur in the contention of the Company on this point, the Board are prepared to adopt it as the basis of their policy in the future.

8. An examination must now be made of the method by which the Committee arrived at its conclusion that as much as £225,000 of the existing surplus, based on the 1934 figures, can be utilised for the purpose of reducing charges. This figure they reach by making certain changes in the accounts; the revenue is written up, and the expenditure and appropriations from revenue are written down. In dealing with the revenue the Committee rightly excluded one abnormal item; but the Board do not consider that there is justification for disallowing any provision for bad debts. The Committee seemed to be under the impression that there is some hidden reserve or fund to meet the losses on this account, which is not the case. With about 64,000 consumers, a large proportion of whom are constantly changing residence, bad debts are inevitable, notwithstanding all the safeguards, and in the Board's opinion some allowance must be made. The figure of £5,000 a year is not unreasonable. In dealing with the expenditure, the main items which the Committee have written down relate to obsolescence and general reserve. As regards the obsolescence of spare parts in stores, the Board cannot understand why a recurring charge of this nature should be entirely disallowed, especially as the Committee advises it being spread over several years. The reasoning here is confused, and the Board must maintain a provision of at least £5,000 under this head.

9. The question of General Obsolescence is more serious. The Committee considers the normal provision for depreciation to be "in no way excessive" (paragraph 55) and recognises that it has "failed to meet fully the requirements in the past" (paragraph 58). But it regards the additional provision for obsolescence as over-generous. The Board cannot share that view. The reasons for the Company's present policy were set out in a document which the Committee has printed in Appendix III of its report (*vide* pages 75-6). The statement of the case was brief, and does not seem to have impressed the Committee. It appears necessary therefore now to explain the policy in more detail.

10. At the outset it should be understood that the provision made for depreciation and obsolescence is settled, year by year, on the requisition of the auditors of the Company. To them accordingly the Board have referred the Committee's proposals for opinion. The reply, so far as it is directly relevant, may be quoted:—"The suggestion of charging the ½ per cent. obsolescence fund on written-down values shows a failure to appreciate the outstanding necessity for a flat rate on original cost to correct

the inherent weakness of depreciation on written-down values." (This being the system now practised.) "Rather than advise adoption of a cut in the obsolescence allocation, we would recommend, wherever possible, depreciation on a percentage of prime cost.....As to the allocation of £20,000 made last year in respect of Cossipore, the Directors of the Company will probably find it absolutely necessary to set a similar amount aside again, as it is known now that Cossipore must be reduced to a lower status."

11. As is implied in this quotation, the depreciation and the obsolescence provisions hang together; and their adequacy is not a matter of expediency or of secondary importance to any of the other claims on the business. Still less are they, as some of the Committee's witnesses argued, a device for hiding away profits. The first essential of a sound undertaking is that its manufacturing capacity should not be allowed to deteriorate, and the provision of ample funds for this purpose is a primary responsibility resting on those who are answerable for the conduct of the business and who alone are in a position to decide whether the provision is adequate or not. In this Company, that responsibility has been a constant anxiety with the Directors; for the special risks to which delicate electrical plant is exposed by the Calcutta climate have to be added to the rapidity with which the machinery generally is superannuated by the developments in electrical science. The expectation of life on which our depreciation percentages are based has, in several important instances, proved unduly sanguine, and in particular it is becoming plain that the percentages should be struck on the original cost of plant and not, as is the present practice, on its written-down value.

12. The whole question of the adequacy of the accumulated depreciation account is being examined; but it is a long and difficult question. In order therefore to meet the more obvious imperfections of the system, the obsolescence provisions were started a few years ago. The fact stressed by the Committee that the actually realised obsolescence averages only £21,000 a year is no possible guide to the proper allowance for plant which is still in commission and is rapidly approaching the end of its economic life. As it is now a practical certainty that the large and fully equipped Cossipore Station will have to be reduced to a stand-by, special provision for amortising the initial cost of its equipment has become an absolute necessity; the ordinary ratios of depreciation would be wholly inappropriate. It may be that, when the whole subject has been thrashed out by the Company's accountants, there will be a readjustment between the depreciation and the obsolescence figures; but any diminution of the total aggregate at present would be false economy in the interests both of the Company and of the consumer; and the Board cannot agree to it.

13. Examining next the General Reserve, the Committee considers further appropriations to it to be unnecessary on the grounds that the Company's total reserves are nearly 25 per cent. of the Block Account, and that, after this year, they will be "much more than what is normally provided for undertakings of this kind." For this latter judgment the Board have been unable to find confirmation. Electrical undertakings with extended tenures may build up their reserves more slowly; but in the circumstances of this Company the ideal of a 25 per cent. reserve is a matter of simple commercial prudence; and its policy in this respect has carried weight in financial circles in London and has materially helped in the obtaining of cheap and abundant capital for the business, a point to which the Board must invite the Government's special consideration.

14. To the Committee's argument that a point has almost been reached where our reserves are equivalent to 25 per cent. of our Block Account, the Board emphatically demur. Apart from the plain fact that the Block Account is rapidly growing, the Committee only reached its conclusion by lumping together (I) the General Reserve, (II) the reserve against reduction of rates, and (III) the debentures sinking fund. As regards the first item, it has recently, in the Company's balance sheets, included a sum of £515·049 which represents premiums that were paid on ordinary shares. This sum has been entirely utilised in financing the Company's development. The propriety of including these premiums in the Reserve Fund has now been questioned by the Company's auditors, who hold that this amount is just as much a part of the capital of the Company as are the shares and loan. On this view—which accords with recognised practice in England—the General Reserve at the end of 1934 amounted to only £729,056. The second item is obviously meant to serve a specific purpose, and is earmarked for that purpose. The third item is not available for any purpose whatsoever except the redemption of the debentures; and although, on redemption, it will be transferred to one or other of the reserves, that may not happen for a considerable number of years, and it is wholly premature to regard the sinking fund as available, now or in the near future, for any emergency which would make a call on our General Reserve. The Board cannot, therefore, whether in the interests of the proprietors or of the consumer, cease to build up the General Reserve at present. They are willing, however, to adopt a slower pace of accretion, and to adopt as a standard appropriation a figure of approximately £25,000 after the present year.

15. There remain the Insurance and Retiring Gratuity Funds. To the former the Board do not propose further appropriations until necessity arises for strengthening the fund. But the Committee's suggested reduction of appropriations to the Retiring Gratuity Fund is inadvisable. As time goes on and the business grows, the

number of senior officials, both British and Indian, steadily increases; and the Board are satisfied that the normal annual charges on the fund will average, in the near future, at least £6,500 a year. It would be unwise to attempt a nominal saving here.

16. It will be seen from the foregoing that it is not possible, working on the figures for 1934, to make available for reduction in rates a sum of the magnitude proposed by the Committee, and thus to reduce the domestic rate to 2 annas a unit. The Board, however, recognise, and they are sure that the Government will appreciate, that in a concern like this, where both the operations and the policy are steadily developing, too much stress cannot be laid on the figures of any single year, though the method employed in this respect by the Committee was clearly safer and fairer than the attempting of forecasts. The Board, however, are engaged, and will continue, in endeavours to budget for the future, with a view to deciding when, and what, further relief can be given to consumers generally.

17. This leads to a consideration of the scope of relief. The Committee definitely excluded the H. T. power rate from participation in any benefits now to be distributed. Its conclusion in this respect does not give sufficient consideration to the part played by the industrial load in the development of the Company's business. There seems to be a considerable impression that the profits from the H. T. supply are negligible in comparison with those derived from the domestic flat rate; and indeed it was alleged in evidence that the domestic consumer is penalized for the benefit of the large power user. The Board desire to remove these misconceptions. Recent years have shown a marked development in the receipts from H. T. power consumers and a gradual reduction in the domestic rate; from which it might be inferred that the profits derived from the industrial supply have been constantly rising and constitute an increasingly large proportion of the annual profits. The Board, however, have minutely examined the facts and analysed the results; and a statistical examination shows that there is a striking closeness between the percentage of profit derived from the power unit and that which is derived from the domestic unit. True it is that the profit on the H. T. unit is but a small fraction of an anna; but that small fraction multiplied many million times means many lakhs of rupees. In truth the profits from the flat rate paid by domestic consumers come to little more than half of the total profits. This in itself is sufficient justification for declining to assent to the Committee's recommendation in favour of refusing to the H. T. consumer any share in such relief in rates as is possible. Furthermore if the Committee's suggestion means that the immediate financial future of the Company is to be mortgaged solely for the benefit of consumers other than the large industries, then it would involve a serious misconception and a narrow outlook. The prosperity of Calcutta and its people depends so much on the large industries that all assistance given to them is a service to the community far exceeding small concessions here and there in the price of domestic necessities. And furthermore, it cannot be too forcibly represented that important extensions of our supply, such as go to the big industries, mean increased output, reduced overheads, and consequently a powerful contribution towards the cheapening of the private consumers' supply. This has been demonstrated so often and so clearly in the history of the Company that it hardly needs emphasizing, were it not for the general refusal to recognise it in the evidence taken by the Committee. The Board must therefore continue to regard their plans for a reduction in H. T. power rates as soon as the developments now in progress are sufficiently advanced, as essential to the interests of the Company and all classes of consumers.

III.—The Board's Proposals.

18. With this necessary explanation, the Board can now represent to the Government how far they consider it reasonable and safe that they should go in meeting the recommendations of the Committee as summarised in paragraph 142 of the report.

(*a*) *Domestic flat rate.*—This rate has already been reduced to 2½ annas per unit, with effect from the 1st January 1935. The Board are prepared to reduce it further to 2¼ annas per unit at once, as well as to make certain other reductions in charges which will be set out below. But to take the further plunge and go down to 2 annas is more than the Board consider can safely be undertaken until they see their way more clearly than they do at present.

(*b*) *Special charges and public lighting.*—As is elsewhere explained, certain reductions in special contract charges and public lighting charges will automatically follow the change in the domestic rate.

(*c*) *Cooking, heating, etc.*—The charge for cooking, heating, refrigeration, etc., presents difficulties which were not brought before the Committee. Plans for meeting these difficulties are actively engaging the Calcutta staff, and as soon as they are successful, the Board will readily bring the rate down to ·75 of an anna. In the meantime, they would prefer that the question of reduction be deferred until they have had a further opportunity of investigating the matter.

(*d*) *Battery charging.*—Although no argument is advanced for the change the Board have no objection to reducing the rate for battery charging from 1¼ annas to 1 anna per unit.

(*e*) *Minimum charge.*—The Board have also no objection to abolishing the minimum charge of Rs. 1-8 per month levied under clause 27 of their Rate Book.

(*f*) *Rebates.*—The complaint against the rebate on the gross rates of the Rate Book was the most unreal of all the grievances which the Committee entertained. The gross rates and the rebates are simply a means of encouraging consumers to pay, with reasonable punctuality, for electric energy *which they have already used.*

The Committee suggests 10 per cent. as an adequate margin between gross and net rates; but the Board can hardly believe that a rebate of ¼ anna, for example, would be an effective incentive to the punctual payment of a net charge of 2½ annas. The Board, however, have no desire to be obstructive in the matter, and are ready to accept a gross rate which will always be one-half anna higher than the net rate for the time being.

(*g*) *Meter rents.*—The only other important conclusion is a reduction in meter rents. To what the Committee has said in its examination of this question (paragraphs 100-109) the Board have little to add, except that the figures in paragraph 106 include nothing for supervision charges or a share in the general management expenses. The Board have no desire to make a profit out of meter hiring; but the proposed reduction of the monthly rental from 8 annas to 4 annas will mean that the department for testing and conditioning meters will be working at a loss. If, however, it will tend to greater contentment, and if the Government are satisfied that it will not establish an embarrassing precedent for smaller Indian undertakings which are more dependent on meter rents than this Company is, the reduction may be made at once.

(*h*) *Small power users.*—The important reduction in the rates for small power users, which apparently meets with the Committee's approval, is being introduced as soon as the instruments for recording the maximum demand can be procured and installed.

19. The Board have no desire whatever to appear obstructive or to postpone measures for the relief of the consumers as and when such measures can be safely introduced. The lines on which the Committee would have them proceed are inconsistent with the safety at which the Company has always aimed. The Committee makes inadequate provision for possible contingencies—rise in prices, wages, cost of coal, shorter hours in industrial working, fluctuations in exchange, etc. etc. It gives no recognition to the fact that capital while money is cheap is being raised for extensive developments which will take several years to come into bearing. It differentiates unreasonably between consumers. There is some danger of its proposals shaking the credit which the Company, for the good of all concerned, occupies in the investment market. This position has been built up over a series of years, with the result that the Company has a reputation for stability which stands it in good stead when cheap and abundant capital has to be obtained. It would be a serious matter both for the Company and the Calcutta public if the Company's good name in this respect were imperilled by any precipitate change. With their more intimate knowledge of the Company's business and affairs, it is not unreasonable to assume that the Board must be in the best position to arrive at responsible decisions regarding the general policy of the Company's undertaking, while striking a fair and even balance between all interested parties. But it is the considered opinion of the Board that the recommendations of the Committee, so far as they exceed the limits to which the Board have intimated their willingness to go, are inadvisable and risky, having regard to all facts and circumstances relative to the Company's position at the present time.

Draft Rules.

DEFINITIONS.

(1) "Health Officer" means any person appointed by Government, either by name or by virtue of his office, to be Health Officer of a port, and includes an Additional or Assistant Port Health Officer, and any officer appointed by Government, either by name or by virtue of his office, to perform any of the duties of a Health Officer of a port.

(2) The term "infected" when used with reference to any articles includes all articles considered by the Health Officer to be infected with any of the diseases specified in these rules.

(4) "*Medical Officer*" (of a vessel) means any person holding medical charge of a vessel.

(5) "*Calling at port*".—A vessel shall be regarded as having called at a port if either it berthed at a quay at that port for any purpose whatsoever or if having berthed elsewhere in the said port, it was in communication with the shore for a purpose other than was strictly necessary for the landing of mails or passengers and their luggage, or for the embarking of mails or passengers with or without their luggage, who had not in any way communicated with such port and who had disembarked from a healthy vessel and had not been exposed to infection in such port."

(6) *Observation.*—The word "observation" signifies the isolation of persons whether on board vessel or at a sanitary station before they obtained free pratique.

(7) *Surveillance.*—The word "surveillance" means that persons are not isolated, that they receive free pratique immediately, but the authorities of the several places whither they are bound are informed of their coming and they are subjected to a medical examination with a view to ascertaining their state of health.

(8) *Crew.*—The word "crew" includes any person who is not on board for the sole purpose of travelling from one country to another, but who is employed in some way in the vessel's service or by persons on board or in connection with the cargo.

(9) *Day.*—The word "day" means an interval of 24 hours.

PART I.

Rules to be observed at ports in India on the arrival of vessels.

1. The diseases to which the rules in this part apply are:—(1) Plague, (2) Cholera, (3) Yellow Fever, (4) Typhus, (5) Small-pox, (6) Chicken-pox, (7) Cerebro-spinal Meningitis, (8) Diphtheria, (9) Relapsing fever, (10) Jigger, and (11) Influenzal pneumonia.

2. The master of every vessel arriving at any port subject to these rules shall show, until the vessel is free from control under these rules, a signal which shall be whichever of the undermentioned signals is appropriate:

(*a*) by day, during the whole of the time between sunrise and sunset, when the ship is within three miles of the coast or is within the limits of a district—

(*i*) the Flag Signal Q: meaning—"my ship is healthy and I request free pratique",

(*ii*) the Two Flag Signal QQ: meaning—"my ship is suspected", *vide* Rules 17, 22, 27, 32, 34 and 38, or

(*iii*) the Two Flag Signal QL: meaning—"my ship is infected", *vide* Rules 17, 22, 27, 32, 34, 38, 40 and 43.

(*b*) by night, during the whole of the time between sunset and sunrise but only when the vessel is within three miles of coast a signal comprising a red light over a white light, the lights being not more than six feet apart, and meaning—"I have not free pratique".

The night signal shall be shown at the peak or other conspicuous place where it can best be seen.

Provided that the authorities at a port may, with the previous approval of Government, notify supplementary signals not conflicting with the International Code, for use by vessels visiting the port frequently.

3. The master of any vessel fitted with a suitable wireless transmitting apparatus shall, when not less than 12 hours out from any port, send to the Health Officer, either directly or through an agent approved by the Health Officer, a wireless message, embodying all such of the items of information set out in the Standard Quarantine Messages of the International Code of Signals as are applicable:

provided that the authorities at a port may, with the previous approval of Government, notify supplementary signals not conflicting with the International Code, for use by vessels visiting the port frequently.

4. Cases of sickness or death occurring subsequent to the transmission of an earlier message shall be notified separately before the arrival of the vessel in the port.

5. On arrival at a port the master shall, at the earlist opportunity, report to the pilot or other boarding officer all matters that have occurred during the voyage which might affect the classification of the vessel as "infected", "suspected" or "healthy" and any sickness or deaths from any cause, and the pilot or other boarding officer shall promptly communicate such report to the Health Officer, provided that in the case of healthy vessels and vessels that are classed as "suspected", not on account of the occurrence of any disease on board but merely by reason that they have sailed from or touched at a particular port, it shall be permissible for the pilot or other boarding officer if acting on the general or special advice of the Health Officer to treat the vessel as "healthy" and allow pratique.

6. If after a vessel has arrived within port limits a case or suspected case of any of the diseases enumerated in Rule 1 occurs on board, the master shall hoist the signal prescribed in Rule 2 for "infected vessels", shall stop all communication with the shore and shall immediately report the circumstances to the Health Officer.

7. Every medical pretitioner, who becomes cognizant that any passenger on board or recently disembarked from any vessel or any member of the crew or any person employed on board any vessel in the port is suffering from any of the diseases mentioned in Rule 1, shall immediately give notice thereof by telephone and in writing to the Health Officer.

8. All infected or suspected vessels shall stop at such place as Government shall by order provide and shall not enter any dock or come alongside any wharf or have communication with the shore until authorised to do so by the Health Officer or in the conditions specified in the proviso to Rule 5, by the pilot or other boarding officer.

9. So long as the signals showing that the vessel is "infected" or "suspected" are shown, no tindal or other person in charge of or navigating any boat shall attempt to take it alongside such vessel except with the permission of the Health Officer, and no person other than a pilot or an official acting in the execution of these Rules shall board or leave any "infected" or "suspected" vessel without the written permission of the Health Officer.

10. Healthy vessels which, while in port, desire to have no communication with the shore shall, on arrival, hoist the code over Q flag by day and by night the "International Code Signal" meaning—"I have not free pratique" specified in Rule 2; provided that a vessel shall only be treated as having no communication with the shore under this rule if making a call of 12 hours or less, and provided that the vessel remains out in the stream and does not enter locked areas or moor alongside any quay.

Such vessels shall be subject to such restrictions as the Health Officer may direct and be guarded by the port sanitary police until departure.

11. In the case of all infected vessels the Health Officer shall, and in the case of all other vessels the Health Officer may proceed on board and examine the vessel, and the master shall give him every facility for the examination of the passengers, crew, personal effects, cargo, provisions, water supply and any part of the vessel the Health Officer considers it necessary to examine. The Health Officer may require a declaration, written or on oath, from the medical officer (if any) of the

vessel or from the master or from both, whether any death or sickness from an unknown or suspicious cause or any case of any of the diseases enumerated in Rule 1 has occurred on board the vessel either during the voyage or before her departure, and with reference to plague, whether any unusual mortality has been observed among rats. If the Health Officer is satisfied that such deaths or cases of sickness as may have occurred were not due to any of the diseases enumerated in Rule 1, he shall permit the vessel to proceed to the usual place of anchorage or berth in harbour and to discharge passengers and cargo without any further restriction. If he is not so satisfied, he shall proceed as provided in these rules. Inspection by the Health Officer under this Rule will not be undertaken between sunset and sunrise except in such unusual circumstances as justify a departure from the usual rule.

12. As the result of every inspection the Health Officer shall finally classify the vessel as infected, suspected or healthy, in accordance with the definitions given hereafter.

13. All cases of Plague, Cholera, Yellow Fever, Typhus and Small-pox shall be removed from a vessel on diagnosis by the Health Officer. The removal of persons who have been in contact with such cases may be enforced by the Health Officer if after full consideration of the circumstances he considers that such removal is necessary to prevent the spread of the disease.

In the case of the other diseases mentioned in Rule 1, the removal of such sick persons and their contacts as are bound for an onward port shall be enforced by the Health Officer only if he considers such action necessary on account of lack of facilities for isolation or treatment on board the vessel.

Whenever a person suffering from one of the diseases mentioned in Rule 1 remains on board, the Health Officer may at his discretion, limit communication with the shore.

14. The Health Officer shall inform the Municipal or Corporation Health Officer in all cases in which he arranges for the conveyance of a patient to a sanatorium or hospital or other place within municipal or corporation limits, and shall furnish the Municipal or Corporation Health Officer with the address of any private residence to which he permits the removal of a patient.

15. Where plague, cholera, or small-pox, is the disease on account of which the vessel is deemed to be infected, the Health Officer shall offer free of charge inoculation, vaccination or re-vaccination to all persons willing to be operated upon and shall cause to be inoculated or vaccinated, if their guardians or those in charge of them consent, all minors whom he may consider to be in a suitable physical condition for such operation.

16. In the case of a vessel infected or suspected to be infected with any of the diseases enumerated in Rule 1, the Health Officer may, whenever he considers it necessary and practicable, intimate by letter or telegram to the health authorities of the Presidency, Province or Indian State concerned, the date of departure, route, number of persons and ultimate destination in the respective Presidency, Province or Indian State of the passengers from the said vessel.

SPECIAL RULES ON ACCOUNT OF PLAGUE.

17. *Infected vessel.*—A vessel shall be regarded as infected—

(1) if it has a case of human plague on board;

(2) or if a case of human plague broke out more than six days after embarkation;

(3) or if plague-infected rats are found on board.

Suspected vessel.—A vessel shall be regarded as suspected:—

(1) if a case of human plague broke out in the first six days after embarkation;

(2) or if investigations regarding rats have shown the existence of an unusual mortality without determining the cause thereof.

The vessel shall continue to be regarded as suspected until it has been subjected to the measures prescribed by these rules at a suitably equipped port.

Healthy vessel.—A vessel shall be regarded as healthy, notwithstanding its having come from an infected port, if there has been no human or rat plague on board either at the time of departure, or during the voyage, or on arrival and the investigations regarding rats have not shown the existence of an unusual mortality and, when unusual mortality among rats has been observed, expert examination has proved that this mortality was not due to plague.

18. In the case of plague-infected vessels, the following measures shall be taken before pratique is given:—

(1) The vessel shall be inspected and all persons on board shall be medically examined;

(2) All persons suffering from plague or suspected to be suffering from plague shall be disembarked and isolated.

(3) In the case of persons who have been in contact with a case of plague, the medical officer, after taking into consideration the date of the last case, the condition of the vessel, and all the circumstances, may either—

(*a*) isolate any such person; or

(*b*) place him under surveillance; or

(*c*) first isolate him and then place him under surveillance:

provided that no person shall be isolated or left under surveillance for a period extending in the aggregate beyond six days after the date of the arrival of the vessel in the port.

During any period of isolation or surveillance the members of the crew may be prohibited from leaving the vessel, except for the purposes of their duty, and after notification to the Health Officer.

(4) Bedding which has been used, soiled linen, wearing apparel and other articles which, in the opinion of the Health Officer, are infected shall be disinsected and, if necessary, disinfected;

(5) The parts of the vessel which have been occupied by persons suffering from plague or which, in the opinion of the Health Officer, are infected shall be disinsected and, if necessary, disinfected.

(6) The Health Officer may require deratisation before the discharge of cargo, if he is of opinion, having regard to the nature of the cargo and the way in which it is loaded that it is possible to effect a total destruction of rats before discharge. In this case, the vessel may not be subjected to a further deratisation after discharge. In other cases the complete destruction of rodents on board shall be effected when the holds are empty. In the case of vessels in ballast, this process shall be carried out as soon as possible before taking cargo.

(7) When before or during the course of discharge of cargo, plague-infected rats are found on board, or when it has been established that there exists on board an unusual mortality among rats, the cause of which has not been determined, the Health Officer may require the fumigation of the ship before, or during the discharge of cargo, and if during the course of discharge, or after the discharge of cargo, live rats are again found, a fresh fumigation may be carried out if the master approves; but only one of the fumigations thus effected shall be done at the expense of the vessel.

If a vessel is to discharge a part of its cargo only, and if the Health Officer considers that it is impossible to carry out complete deratisation, the said vessel may remain in the port for the time required to discharge that part of its cargo, provided that all precautions, including isolation, are taken to the satisfaction of the Health Officer to prevent rats from passing from the vessel to the shore, either during unloading or otherwise.

The discharge of cargo shall be carried out under the control of the Health Officer, who shall take all measures necessary to prevent the staff employed on this duty from becoming infected. The staff shall be subjected to observation or to surveillance for a period not exceeding six days from the time when they have ceased to work at the unloading of the vessel.

19. When the measures prescribed in Rule 18 have been duly taken in respect of any infected vessel the Health Officer shall, by written order, grant pratique: provided that, if a case of plague or of illness suspected to be plague, occurs on board subsequent to the grant of the above certificate, the certificate shall become invalid and the vessel again becomes subject to the requirements of the rules regarding infected vessels.

20. In the case of plague-suspected vessels, the measures specified in (1), (4), (5) and (6) of Rule 18 shall be taken at the discretion of the Health Officer before pratique is given. In addition, the crew and passengers may be subjected to surveillance or observation, the duration of which, dating from the arrival of the vessel, shall not exceed six days. The crew may, during the same period, be prevented from leaving the vessel except on duty notified to the Health Officer.

21. Healthy vessels shall be admitted to free pratique. The only measures which the Health Officer may take as regards these vessels are the following:—

(*i*) medical inspection as prescribed in Rule 11;

(*ii*) destruction of rats on board in exceptional cases and for well-founded reasons which shall be communicated in writing to the master of the vessel;

(*iii*) the crew and passengers may be subjected to surveillance during a period which shall not exceed six days reckoned from the date on which the vessel left the infected port. The crew may during the same period be prevented from leaving the vessel except on duty notified to the Health Officer.

SPECIAL RULES ON ACCOUNT OF CHOLERA.

22. *Infected vessel.*—A vessel shall be regarded as infected if there is a case of cholera on board or if there has been a case of cholera during the five days previous to the arrival of the vessel in port.

Suspected vessel.—A vessel shall be regarded as suspected if there has been a case of cholera at the time of departure or during the voyage, but no fresh case in the five days previous to arrival. The vessel shall continue to be regarded as suspected until it has beer subjected to the measures prescribed by these rules.

Healthy vessel.—A vessel shall be considered healthy, although arriving from an infected port or having on board persons proceeding from an infected area, if there has been no case of cholera either at the time of departure, during the voyage, or on arrival.

Cases presenting the clinical symptoms of cholera, in which no cholera vibrios have been found or in which vibrios not strictly conforming to the character of cholera vibrios have been found, shall be subject to all measures required in the case of cholera.

23. In the case of cholera-infected vessels, the following measures shall be taken before pratique is given:—

(1) The vessel shall be inspected and all persons on board shall be medically examined.

(2) All persons suffering from cholera, or suspected to be suffering from cholera shall be disembarked and isolated.

(3) The members of the crew and the passengers may be disembarked and either be kept under observation or subjected to surveillance for a period not exceeding five clear days from the date of arrival of the vessel, provided that persons satisfying the Health Officer that they have been protected against cholera by vaccination effected within the preceding six months excluding the last six days thereof may be subjected to surveillance but not to observation.

(4) Bedding which has been used, soiled linen, wearing apparel and other articles, including foodstuffs, which, in the opinion of the Health Officer of the port, have been recently contaminated, shall be disinfected.

(5) The parts of the ship that have been occupied by persons infected with cholera or that the Health Officer regards as infected, shall be disinfected.

(6) Unloading shall be carried out under the supervision of the Health Officer who shall take all measures necessary to prevent the spread of infection, including the placing of the personnel employed on the unloading under observation or surveillance for a period not exceeding five days from the time when they ceased unloading.

(7) If the drinking water stored on board is suspected by the Health Officer, he shall cause it to be emptied out after it has been disinfected, and to be replaced after disinfection of the tanks and filters by a supply of wholesome drinking water.

(8) The Health Officer may prohibit the emptying of water ballast in port without previous disinfection if it has been taken in at an infected port.

(9) The Health Officer may require human dejecta and the waste water of the vessel to be disinfected before they are discharged from the vessel.

24. *Cholera-suspected vessels.*—In the case of cholera-suspected vessels, the measures specified in (1), (4), (5), (7), (8) and (9) of Rule 23 shall be taken at the discretion of the Health Officer before pratique is given.

In addition, the crew and passengers may be subjected to surveillance the duration of which, dating from the arrival of the vessel, and shall not exceed five days. The crew may, during the same period, be prevented from leaving the vessel except on duty notified to the Health Officer.

25. *Clinical Cholera.*—If the vessel has been declared infected or suspected on account only of a case on board presenting the clinical features of cholera, and two bacteriological examinations, made with an interval of not less than 24 hours between them, have not revealed the presence of cholera or other suspected vibrios, the vessel shall be considered healthy.

26. *Healthy vessels* shall be admitted to free pratique. The only measures which the Health Officer may take as regards these vessels are those specified in (1), (3), (7), (8) and (9) of Rule 23.

SPECIAL RULES ON ACCOUNT OF YELLOW FEVER.

27. *Infected vessel.*—A vessel shall be regarded as infected if there is a case of yellow fever on board, or if there was one at the time of departure or during the voyage.

Suspected vessel.—A vessel shall be regarded as suspected, if, although there has been no case of yellow fever, it arrives after a voyage of less than six days from an infected port or from a port in close relation with an endemic centre of yellow fever, or if it arrives after a voyage of more than six days and there is reason to believe that it may carry from the said port adult stegomyia (aedes egypti) or other mosquitoes which are considered capable of transmitting the disease.

Healthy vessel.—A vessel shall be regarded as healthy notwithstanding its having come from an infected port, if on arriving after a voyage of more than six days it has had no case of yellow fever on board and either there is no reason to believe that it transports mosquitoes believed to be capable of transmittting yellow fever, or it is proved to the satisfaction of the Health Officer:—

(*a*) that the vessel, during its stay in the port of departure, was moored at a distance of at least 200 metres from the inhabited shore and at such a distance from harbour vessels (pontoons, etc.), as to make the access of mosquitoes improbable.

(*b*) or that the vessel, at the time of departure, was effectively fumigated in order to destroy mosquitoes.

28. The only port of entry in India open to vessels infected with yellow fever is the port of Bombay.

29. In the case of vessels infected with yellow fever, the following measures shall be taken before pratique is given:—

(1) The vessel shall be inspected and all persons on board shall be medically examined.

(2) All persons suffering from yellow fever, or suspected to be suffering from yellow fever, shall be disembarked and those of them who are in the first five days of the disease shall be isolated in such a manner as to prevent the access of any mosquitoes to them.

(3) All other persons who disembark shall be kept under observation during a period which shall not exceed six days reckoned from the date of their disembarkation.

(4) The vessel shall be moored at such distance, not being less than 200 metres, from the inhabited shore and from all other vessels, as will render the access of mosquitoes from shore to vessel or from vessel to shore improbable.

(5) The destruction of mosquitoes in all phases of growth shall be carried out on board, as far as possible before discharge of cargo; if discharge is carried out before the destruction of mosquitoes, the personnel employed shall be subjected to observation or to surveillance for a period not exceeding six days from the time when they ceased unloading.

30. *Yellow fever suspected vessel.*—Vessels suspected of yellow fever may be subjected to the measures specified in (1), (3), (4) and (5) of Rule 29 before pratique is granted.

Nevertheless, if the voyage has lasted less than six days and if the vessel complies with the conditions specified under paragraphs (*a*) and (*b*) of Rule 27 relating to healthy vessels, the vessel shall be subjected to the measures prescribed by Rule 29 (1) and (3) only and to fumigation.

When 30 days have been completed after the departure of the vessel from the infected port, and no case has occurred during the voyage, the vessel may be granted free pratique subject to preliminary fumigation should the Health Officer consider this to be necessary.

31. *Healthy vessels.*—Healthy vessels shall be granted free pratique after medical inspection.

SPECIAL RULES ON ACCOUNT OF TYPHUS.

32. *Infected vessel.*—A vessel shall be regarded as infected if during the voyage or at the time of arrival it has had or has one or more cases of typhus on board.

Suspected vessel.—A vessel shall be regarded as suspected if there has been no case of typhus on board but it carries any person or persons who, within the twelve days prior to arrival, left an area where typhus was epidemic at the time of their departure.

33. In the case of infected vessels, the following measures shall be taken:—

(1) The vessel shall be inspected and all persons on board shall be medically examined.

(2) All persons suffering from typhus, or suspected to be suffering from typhus, shall be disembarked, isolated and deloused.

(3) Other persons reasonably suspected to harbour lice, or to have been exposed to infection, shall also be deloused and may be subjected to surveillance during a period which shall be specified, but which in any event shall not exceed 12 days, reckoned from the date of delousing.

(4) Bedding which has been used, linen, wearing apparel, and other articles which the Health Officer considers to be infected, shall be disinsected.

(5) The parts of the vessel which have been occupied by persons infected with typhus and which the Health Officer regards as infected shall be disinsected.

33. (*a*) *Typhus-suspected vessels.*—Vessels suspected of typhus may be subjected to the measures specified in (1), (3) and (4) of Rule 33 before pratique is given.

In all cases, a note shall be made on the bill of health, stating the nature of the infectious disease and whether diagnosed definitely or suspected, and the precautions taken in connection therewith.

PART II.

Rules to be observed in the case of vessels leaving ports in India for ports beyond India.

55. (1) In the case of vessels leaving any Indian port for any port beyond India, the Health Officer shall take effectual measures by medical examination to prevent the embarkation of persons showing symptoms of plague, cholera, yellow fever, typhus, small-pox or any of the diseases specified in rule 1 and of persons in such relation with the sick as to render them liable to transmit the infection of these diseases.

(2) Such medical examination shall ordinarily take place by day on shore as shortly as possible before embarkation, the time and place being fixed by the Health Officer. The Health Officer may, however, at his discretion, arrange to examine on board such passengers or members of the crew as have not remained one night on shore.

(3) Any person wilfully neglecting or refusing to attend at the time and place appointed for such medical examination shall be liable to the penalty prescribed in Section 54 of the Indian Ports Act, 1908 (XV of 1908).

(4) In case the disease or diseases with which the port has been declared to be infected, be plague, cholera or small-pox, it shall be competent for Government by general or special orders to direct that all persons sailing on the vessel shall submit to inoculation or vaccination or both or satisfy the Health Officer by the production of valid certificates or otherwise that they are adequately immunised against the disease or diseases in question.

(5) In any case where he considers such action necessary, the Health Officer may cause to be disinfected or disinfested on shore previous to embarkation any clothing, bedding or other articles belonging to any person and in the absence of such disinfection or disinfestation any such clothing, bedding or other articles shall not be allowed on board any vessel or, if already placed on board, shall be removed as quickly as possible.

(6) The master of a vessel shall not allow the embarkation of any clothing, bedding or other articles belonging to new members of the crew unless the embarkation of such baggage has been authorised by the Health Officer of the port.

56. It shall be open to the Consular representative interested in any vessel to be present, if he so desires, at the medical examination conducted by the Health Officer under Rule 55 and at the disinfection, if any, ordered by him under clause (5) of that rule.

57. At all ports declared to be infected, the Health Officer shall take effectual measures—

(1) in the case of plague, to prevent rats gaining access to vessels;

(2) in the case of cholera, to ensure that drinking water and foodstuffs taken on board are wholesome, and that water taken in as ballast is disinfected if necessary;

(3) in the case of yellow fever, to prevent mosquitoes gaining access to vessels;

(4) in the case of typhus, to secure the delousing of all suspects before their embarkation; and

(5) in the case of small-pox, to ensure that old clothes and rags, whether baled or otherwise, have been thoroughly disinfected before loading.

58. On the completion of the medical examination, the Health Officer shall give to the master of the vessel a bill of health to that effect stating that all the measures, which, in his opinion, are necessary, under Rules 55 and 57, have been carried out:

Provided that, if the vessel has not been in communication with the shore, the measures prescribed in Rule 55 shall be taken only in respect of persons joining the vessel at that port. In such a case the bill of health need only take the form of an endorsement on the last bill of health held by the vessel and need only refer to the passengers and crew embarking at the port in question:

Provided also that once the bill of health has been granted, no person, baggage or merchandise shall be taken on board except with the permission of the Health Officer to whom, in such event, the bill of health shall be returned by the master for necessary amendment if the Health Officer considers such amendment necessary.

59. If any vessel does not leave port within 24 hours after the medical examination made under Rule 55 she shall not leave until—

(*a*) a fresh medical examination of the passengers and crew has been made under that rule, and

(*b*) a fresh bill of health has been given to the master under Rule 58:

Provided that such fresh examination may be conducted on board the vessel, whether or not there has been communication with the shore since the previous examination was made, and provided that if the time of departure be after sunrise on the day after that of inspection, the master of the vessel shall send the bill of health to the Health Officer to have the date of departure amended.

60. Previous to the departure of a vessel, the Health Officer shall direct it to be cleared for medical inspection and this shall be signified by the hoisting of Q flag. After this has been done, no person except the pilot or any person specially authorised by the Health Officer shall be permitted to embark or go on board the vessel even as a visitor, unless he has been medically examined by the Health Officer as prescribed in Rule 55.

61. Port-clearance shall not be granted for any vessel, unless and until the master produces the bill of health prescribed in the foregoing rules:

Provided that, at any port where, in the opinion of Government, local conditions render this relaxation advisable, the authority responsible for granting port-clearance may grant it for any vessel on receiving from the agents of the vessel a written guarantee that a duplicate of such bill of health, signed by the Health Officer, will be furnished by them to him within forty-eight hours.

62. (1) If the Health Officer considers that any member of the crew of the vessel is suffering from, or is in the incubation stage of any infectious or contagious disease or likely to convey such disease—

(*a*) he shall prevent such member from re-embarking on, or if already embarked, shall cause him to be removed from such vessel and may, at his discretion, refuse to give a bill of health until the baggage and personal effects of such members have been removed from the vessel and such parts of the vessel as have been occupied or frequented by such members have been disinfected; and

(*b*) the baggage and personal effects of such persons as were in immediate contact with such member of the crew may also be disinfected, and the names of such persons given to the medical officer or master of the vessel for supervision on the voyage.

(2) If the Health Officer of the port considers that the rats on board are infected with plague, he shall destroy the rats in the manner provided for in Rules 18 (6) and (7).

(3) All action taken under clauses (1) and (2) of this rule shall be noted in the bill of health.

63. Any person who is prevented by the Health Officer under the foregoing rules from embarking or sailing, may be removed to and kept at a hospital or kept under observation, or subjected to surveillance under the conditions prescribed by Rules 50 to 53.

64. Whether the port of embarkation has been declared infected or not, Rules 55 to 63 shall apply to all pilgrim and emigrant vessels and the Health Officer may, at his discretion, apply them to any vessel leaving for any port beyond India. By the special orders of the Governor-General in Council, they may also be applied to vessels leaving any port in India or Burma for any other port in India or Burma.

PART III.

General Rules.

65. In accordance with the provisions of Article 28 of the International Sanitary Convention, 1926, all ships, except those employed in national coastwise service, shall be periodically deratised, or be permanently so maintained that any rat population is kept down to the minimum. In the first case, they shall receive Deratisation Certificates, and in the second Deratisation Exemption Certificates.

Note.—The only ships which can be considered as employed "in national coastwise service" are those trading between ports in India and Burma only. Ships trading to Singapore, Penang, Ceylon, Aden and the Persian Gulf as well as to ports in the foreign settlements in India cannot be exempted from the necessity of providing themselves with the certificates. The fees payable for the certificate as well as for the process in connection therewith will be fixed by orders issued by Government from time to time.

66. A Deratisation Certificate or a Deratisation Exemption Certificate shall be issued only by the Health Officers of the Ports of Bombay, Calcutta and Rangoon. Every such certificate shall be valid for six months but this period may be extended by one month in the case of a ship proceeding to its home port.

67. If no valid certificate is produced, the Health Officer of any of the ports mentioned in Rule 66 may after enquiry and inspection—

(*a*) himself carry out deratisation of the vessel, or cause such operations to be carried out under his direction and control. On the completion of these operations to his satisfaction, he shall issue a dated Deratisation Certificate. He shall decide in each case the technique which should be employed to secure the practical extermination of rats on board, but details of the deratising process applied and of the number of rats destroyed shall be entered on the certificate. Destruction of rats shall be carried out so as to avoid as far as possible damage to the vessel and cargo (if any). The operation must not last longer than 24 hours. In the case of vessels in ballast the process shall be carried out before taking cargo. Any charges made in respect of these operations of deratisation and any question of compensation for damage shall be governed by the terms of Article 18 of the International Sanitary Convention, 1926;

(*b*) issue a dated Deratisation Exemption Certificate if he is satisfied that the vessel is maintained in such a condition that the rat population is reduced to a minimum. The reasons justifying the issue of such a certificate shall be set out in the certificate.

All requisite and practicable measures shall be taken by the competent authorities to secure the destruction of rats in ports and their surroundings as well as on lighters and coastwise vessels.

68. The Health Officer may at any time inspect any vessel within the precincts of the port with regard to the prevalence and breeding of rats, mosquitoes or other vermin or insects thereon, and make recommendations to the master, owner or agent for the destruction of such rats, mosquitoes, vermin or insects and the elimination of their breeding places on board, and, subject to such general or special orders as may be issued by Government in this behalf, may require such measures to be adopted and, in default, carry them out himself or cause them to be carried out at the expense of the master, owner or agent.

69. Whenever a person suffering or suspected to be suffering from an infectious disease or anyone who has been in contact with such a person and is considered liable to develop such infectious disease is disembarked from a vessel, the Health Officer shall notify the Corporation or Municipal Health Officer and supply him with the necessary particulars.

70. The Health Officer may direct the disinfection or in special cases the destruction of foodstuffs which have been exposed to contamination and are considered likely to be infected with any disease or to be dangerous to public health.

71. (1) The Health Officer shall, on request, furnish the master or any representative of the owner or agent, free of charge, with a certificate specifying the nature of the sanitary measures undergone, and the methods applied, the parts of the vessel treated, and the reasons for employing such measures.

(2) He shall, on request, furnish any passenger who has arrived by an infected vessel, free of charge, with a certificate setting out the date of arrival and the measures to which the passenger or his baggage has been subjected.

Disposal of dead bodies.

72. Disposal shall be as follows:—

(1) If death occurs on board a vessel before entering port limits, the body shall, unless there are special reasons to the contrary, be buried at sea in not less than nine fathoms of water, in such manner as shall secure its immediate sinking and remaining below the surface.

(2) If death occurs during the day on board a vessel within the port limits the ensign and house flag, if any, should immediately be lowered to half-mast and kept in that position from sunrise till sunset as long as body remains on board. If death occurs between sunset and sunrise, one red light shall be hoisted at the peak, half-mast high.

(3) If death occurs on board a vessel within the port limits, or if a vessel arrives having on board a dead body, the master of such vessel shall at once inform the Health Officer of the fact and shall carry out such instructions for the disposal of the body and for the cleansing and disinfection of the vessel as may be given by the Health Officer.

BENGAL LEGISLATIVE COUNCIL DEPARTMENT.

NOTIFICATION.

No. 1500L.C.--9th May, 1936.--The following report of the Select Committee on the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bhupendra Narayan Sinha Bahadur of Nashipur, M.L.C., with the Bill embodying an amendment recommended by the Committee, is hereby published for general information.

Report of the Select Committee on the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bahadur Bhupendra Narayan Sinha of Nashipur, M.L.C.

We, the members of the Select Committee of the Bengal Legislative Council to which the Bengal Patni Taluks Regulation (Amendment) Bill, 1936, by Raja Bahadur Bhupendra Narayan Sinha of Nashipur, M.L.C., was referred by a motion carried in the Bengal Legislative Council on the 27th February, 1936, have the honour to submit this our report with the Bill embodying an amendment recommended by us, annexed. The matter omitted by the Select Committee has been printed in italics and enclosed in square brackets and new matter recommended to be inserted has been underlined.

2. The Bill was published in English in the *Calcutta Gazette* of the 19th March, 1936.

3. We do not consider that the Bill has been so altered by our recommendation as to require republication.

4. The Committee met on the 23rd March, 1936, and concluded its sitting on the same day.

Clause 2.—We consider that the proposed amendment can be made more appropriately in section 17.

Any party to a suit relating to the sale or to the disposal of the purchase money should, in our opinion, be entitled to make an application for investment of the sum in deposit.

It is desirable to make it clear that the sum to be invested is the residue which remains after deducting the amount due to Government under the second clause of section 17 and after satisfying the demand of the *zemindar* under the third clause of that section.

The clause in its original form referred only to a suit for the reversal of the sale, but it should apply also to the suits contemplated by the fifth clause of section 17.

We have modified clause 2 accordingly.

We recommend that the Bill, as reported on by us, be passed.

Minute of dissent by Rai Bahadur Hem Chandra Roy Choudhuri, M.L.C.

For the sake of security of purchase money it should be provided in the Act that either the investment must be made in Government securities or all the interested persons in the surplus sale proceeds including the tenure-holders of second degree who may not be the parties to the suit relating to the sale will be given an opportunity to submit their objection, if any, before the Court about the proposed investment. They should also have a right of appeal against the decision of the Court on the point.

In some cases several suits relating to the sale of a Patni Taluk may be instituted in different Courts of same or different jurisdiction within the same or different districts. Parties in these suits may not be the same group of persons. It should, therefore, be made clear, the direction of which Court the Collector would follow.

(5) Any amount directed to be paid under this section may be recovered—

(a) if the authority is a Magistrate, by the authority as if it were a fine imposed by him as Magistrate, and

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly, and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill* was introduced in the Legislative Assembly on the 8th April, 1936:—

L. A. BILL No. 14 OF 1936.

A Bill to amend the Indian Aircraft Act, 1934, for a certain purpose.

WHEREAS it is expedient to amend the Indian Aircraft Act, 1934, for the purpose hereinafter appearing; It is hereby enacted as follows:— XXII of 1934.

Short title.

1. This Act may be called the Indian Aircraft (Amendment) Act, 1936.

Insertion of new section 8A in Act XXII of 1934.

Power of Governor General in Council to make rules for protecting the public health.

2. After section 8 of the Indian Aircraft Act, 1934 (hereinafter referred to as the said Act), the following section shall be inserted, namely:— XXII of 1934.

"8A. The Governor General in Council may, by notification in the Gazette of India, make rules for the prevention of danger arising to the public health by the introduction or spread of any infectious or contagious disease from aircraft arriving at or being at any aerodrome and for the prevention of the conveyance of infection or contagion by means of any aircraft leaving an aerodrome and in particular and without prejudice to the generality of this provision may make, with respect to aircraft and aerodromes or any specified aerodrome, rules providing for any of the matters for which rules under sub-clauses (i) to (viii) of clause (*p*) of sub-section (*1*) of section 6 of the Indian Ports Act, 1908, may be made with respect to vessels and ports." XV of 1908.

Amendment of section 10, Act XXII of 1934.

3. In section 10 of the said Act, for the words and figure "or section 8" the words, figures and letter ",section 8 or section 8A" shall be substituted.

*The Governor General has been pelased to accord the sanction required by section 67 (2) of the Government of India Act.

STATEMENT OF OBJECTS AND REASONS.

Under section 6(*1*) (*p*) of the Indian Ports Act, 1908 (XV of 1908), Local Governments are empowered to make rules for the prevention of danger arising to public health by the introduction and the spread of any infectious or contagious disease from vessels arriving at, or being in, any sea port, and for the prevention of the conveyance of infection or contagion by means of any vessel sailing from any such port. The development of air traffic has made it necessary to establish similar control over incoming and outgoing aircraft and as a first step in this direction a whole-time Health Officer has recently been appointed at the Karachi Air Port. There is, however, no provision of present law under which rules laying down and authorising the action to be taken by such an officer can be made. The absence of any such provision is a serious drawback and may, any moment, prove a source of great embarrassment especially as conditions in India are favourble to the spread of yellow fever and there is a risk, as a result of the rapid development of air traffic, of this disease being introduced into India from Africa by the entry of an infected person or infected insect, if adequate measures are not taken to prevent it. The Government of India have, therefore, come to the conclusion that it is desirable to amend the Indian Aircraft Act, 1934 (XXII of 1934), so as to enable the Governor General in Council to make the necessary rules. The Bill is designed to provide for the carrying out of the requisite amendments.

General.

8. In the preamble and throughout the said Act, for the word "Committee" and for the words "Tea Cess Committee", wherever they occur, the word "Board" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

The Indian Tea Cess Act was amended last year in order to raise the maximum rate of cess leviable from 8 annas to 12 annas per 100 lbs. of tea exported. That amendment was admittedly an emergency measure dictated by the necessity of providing additional funds for propaganda purposes and it was recognised that the Act required amendment in other respects. In the course of the debate on the amending Bill an undertaking was given that a more comprehensive measure would be brought forward. The present Bill seeks to give effect to that undertaking.

2. The more important amendments which are now proposed are as follows:—

(*a*) that the designation of the Committee administering the Cess funds be changed to "The Indian Tea Market Expansion Board"—a description which sets out more specifically the nature of the activities of the Committee;

(*b*) that the strength of the Committee be increased from 20 to 25 in order to permit of greater representation of Indian tea interests;

(*c*) that, in order to provide finance for continuous propaganda in the non-exporting season, the Committee be given power to borrow, subject to the limitations set out in the Bill;

(*d*) that the objects for which the cess may be expended be so defined as to permit of the participation of the Indian Committee in joint propaganda together with the two other important tea producing countries of the world;

(*e*) that, in order to provide adequate funds for propaganda purposes, the maximum rate of cess leviable be raised from annas 12 to Rs. 1-8 per 100 lbs.

3. These proposals have been accepted by all Local Governments and Indian States concerned in the production of tea and carry with them the overwhelming support of the tea growing industry in India. A very large majority of the commercial bodies which have been consulted have also expressed themselves in favour of the proposed amendments.

II. (1) *Capital and Income.*—The capital of the Institution consists of a permanent investment of Rs. 10,67,000, in 3½ per cent. stock certificates together with a temporary investment of Rs. 30,673-6-0 as detailed below:—

(1) Rupees 17,000 in 4½ per cent. loan of 1955-60.
(2) Rupees 5,500 in 5 per cent loan of 1939-43, the scrip of which is all held by the Imperial Bank of India.
(3) Rupees 3,173-6-0 at 1½ per cent. in the Savings Bank Account of the Imperial Bank of India.
(4) Rupees 5,000 at 2½ per cent. as fixed deposit with Lloyds Bank, Ltd.

(2) The temporary investment from savings thus stood at the end of the year at Rs. 30,673-6-0 as compared with Rs. 34,599-8-0 in 1934.

(3) The total interest obtained in 1935 was Rs. 35,354-1-2 against Rs. 38,397-14-11 in 1934 and Rs. 38,200-4-0 in 1933 In addition there was a refund of Rs. 4,000 transferred from the Savings Bank Account to the current account and Rs. 3,166-3-0 on other accounts as well as Rs. 410-0-0 as contributions from parents, and Rs. 118-3-0 as interest in the Savings Bank Account, making the total income for the year Rs. 43,048-7-2 as compared with Rs. 42,912-6-11 in 1934.

(4) The amounts received as interest, etc., were kept with the Imperial Bank of India, and in November 1935 it was found necessary to transfer Rs. 3,000-0-0 from the Savings Bank Account of the Imperial Bank of India to the current account, and to retain the Rs. 5,000-0-0 at 2½ per cent. in fixed deposit with Lloyds Bank, Ltd., with a view to re-investment at favourable rates

The year opened with a balance of Rs. 8,108-11-7, and closed with a balance of Rs. 16,210-9-3. This balance includes the sum of Rs. 8,173-6-0 in the Savings Bank Account, Imperial Bank of India, and on fixed deposit with Lloyds Bank, Ltd.

(5) The following table shows the progress of expenditure during the last five years as compared with the income:—

	1931.	1932	1933.	1934.	1935.
	Rs. a. p.	Rs a p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

Total ..	53,110 11 6	54,560 7 11	51,707 12 3	51,298 6 2	51,157 2 9

(6) From the above summary it will be seen that the financial posititon of the fund is steadily improving. Further investments have not been possible during the year owing to banks not accepting fixed deposit for short periods, and if the policy is pursued of striking off the names of wards whose work is unsatisfactory there will be during the next few years, an annual surplus of income over expenditure for investment. This may ultimately enable the Governors to consider the possibility of raising the present age limit of 17, and assisting more girls to take University Examinations or some special training.

(7) The number of wards on the 31st December, for each of the last five years, will be seen from the table given below:—

1931.	1932.	1933	1934.	1935.
93	95	84	97	99

(8) Four wards were withdrawn during the year. Up to the date of writing of this report (25th March 1936) 9 of the total of 99 wards on 31st December left. At the time of writing there are therefore 90 old wards *plus* 16 newly elected wards or 106 wards in all, as compared with 103 on the same date in 1935.

III. (1) *Election to vacancies, etc.*—The annual election of wards was held on Monday, the 2nd December 1935. On that date 10 vacancies were anticipated before 1st January 1936, but it had previously been decided to advertise 15 vacancies, and 102 applications were received. These were considered by a sub-committee consisting of (1) the Revd. Father F. Keyeux, S. J., (2) the Ven'ble Archdeacon E. J. Young, (3) the Revd. C. H. Archibald, (4) Mrs. W. A. Burns and (5) Mr. R. Wolfenden, Inspector of European Schools, Bengal (Convenor), and on their recommendation 15 girls were elected. Of the 15 girls elected (against 16 in the previous year) four were placed in the Pratt Memorial School, three in the Loreto Convent, Entally, one in the Convent of St. Joseph's, Kalimpong, three in St. Thomas' School, Kidderpore, two in the Calcutta Girls' High School, one in the Loreto Convent, Asansol, and one in St. Michael's Diocesan Girls' School, Darjeeling. Out of the three girls placed on the reserve list one was given a vacancy which was reported later and placed in the Calcutta Girls' High School, thus bringing the number of new wards in 1936 to 16.

(2) As favourable medical and school reports were received regarding the 8 girls elected in 1934, their election was confirmed by the Governors.

(3) Of the 13 girls who left during the year under report:—

one was withdrawn on the expiration of the extension granted to her,

two were withdrawn by their parents,

two on expiration of the extension granted to them for completing the Commercial Course at the Y. W. C. A., and

eight on completing 17 years.

(4) Of the 6 girls who left during the year 1934, three took up shorthand-typing with a view to employment. One joined the Civil Hospital, Amritsar, as a probationary nurse. One was withdrawn by her parents who left Calcutta on the retirement of the father from the Railway, and another was reported to be employed as a child's nurse.

(5) At the close of the year the 99 girls on the rolls were distributed as follows:—

Loreto Convent, Entally—	
1st Boarding ...	9
2nd Boarding ...	9
Calcutta Girls' School ...	16
Pratt Memorial School ...	18

(6) The following table gives particulars as to the class and religion of the wards at the close of the year:—

Class.	Roman Catholic.	Church of England	Non-Conformist.	Total.
(1) Orphans or deserted by their parents .	10	5	3	18
(2) Fatherless or motherless or deserted by their father or mother .	29	25	9	63
(3) Those who have both parents alive ..	9	6	3	18
Total ..	48	36	15	99

IV. (1) *Education and maintenance.*—The nature of the education imparted to the wards continued to be that prescribed for a higher grade school under the Code of Regulations for European Schools in Bengal, but about more than half the total number of wards read in secondary schools.

(2) The Governors are anxious that Bruce wards should become useful citizens when they leave school and have accordingly asked the Visiting Governors to make, in consultation with the school authorities, definite proposals where this seems desirable for training wards who have attained or about to attain the age of 14, so that the last three years of their school life may be spent to the best advantage and be a preparation for earning a living.

(3) The following are the only successes of Bruce wards at Public Examiantion that have been reported up to the date of issue of this report:—

One passed the Senior Cambridge Examination and two the Junior Cambridge Examination. One passed the Higher Local Practical and Theoretical Examinations of the Trinity College of Music, one the Junior and obtained Honours in the Theoretical Examination, another the Practical Senior (Trinity College)—Piano, and one the St. John's Ambulance First Aid.

(4) Under the rules a ward is not ordinarily allowed to remain on the Foundation after the age of 17, when an outfit grant of Rs. 100 is given to enable her to make a start in life. In cases where wards wish to be trained as teachers, and have the support of the school authorities, or when some special training is recommended, or when a ward is preparing for a higher examination, such as the Intermediate Arts of Commercial Course Examinations, and in the event of a ward being well-reported on, some extension of the period of benefit is generally allowed. Nine wards were granted extensions during the year under report, one up to the 31st March 1937, another up to the 30th November 1937 for training as a teacher, one up to the 30th June 1937, one up to the 30th September 1936, two up to the 31st December 1936, to appear in the Senior Cambridge, another up to the 30th September 1936 to take a commercial course and two others up to the end of the school term in 1936.

(5) The average monthly cost for the actual education and maintenance of each ward amounted to Rs. 25-2-9 against Rs. 26-2-0 in the preceding year. If all expenditure in connexion with the Trust be included the figures are Rs. 28-4-5 and Rs. 29-8-0 respectively.

(6) The amounts paid under the different heads of expenditure were as noted below:—

1934.	Rs.	a.	p.
Education and maintenance	31,345	10	0
Office establishment	1,141	7	3

Other charges	1,077	4	9
Total ..	34,946	9	6

V. *Inspection.*—Mrs. W. A. Burns was appointed Visiting Governor for the first half and the second half of the year 1935 to visit schools—chiefly those in Calcutta— who have Bruce wards. Mrs. Burns visited all the schools in Calcutta and saw the wards in each of them. She was very much impressed with the healthy appearances of the girls and the great care taken of Bruce wards by those in charge. Mrs. Burns desired to place on record the deep interest taken by those in charge of the five Calcutta schools containing Bruce wards, and the attention and care given to them. All the Bruce girls are in good health and happy, and in most cases doing well.

VI. *Meetings.*—Four meetings were held during the year, and among the resolutions passed the following may be noted:—

That the following rule be substituted for the existing rule 44 of the rules of the Bruce Institution:—

44. The Governors may, however, at their discretion permit a ward to be so educated or maintained after her seventeenth birthday either—

(*a*) to enable her to remain at school until the end of the school term or year, or

(*b*) to enable her to prepare for and take an examination, or

(*c*) to enable her to take up some approved course of training.

In no case may a girl receive the benefits of the Bruce Institution after she has attained the age of 19 years.

Resolution on the Report on the working of the Co-operative Societies in the Presidency of Bengal for the year ending 30th June 1935.

GOVERNMENT OF BENGAL.

Department of Agriculture and Industries.

Co-operative Societies.

DARJEELING, THE 5TH MAY 1936.

RESOLUTION—No. 99T.A.I.

Minister-in-charge: The Hon'ble Nawab Sir Mohiuddin Faroqui, Kt., of Ratanpur.

Read—

The Report on the working of the Co-operative Societies in the Presidency of Bengal for the year ending 30th June 1935.

Khan Bahadur A.M. Arshadali was in charge of the Department throughout the year. There was no change in the supervising staff of the Department during the period under review.

2. Unfavourable climatic conditions and the continued economic depression resulted in another year of anxiety and strain. The frozen condition of the agricultural credit movement continued, and collections of both principal and interest in the central banks and primary societies showed a decline on the percentages of the previous year. Loans and deposits from central banks and individuals decreased, and there was a decline in the amount of cash loans issued. There was no scope for the organisation of fresh societies although the embargo on their formation was raised in January 1935, when sanction was given to a cautious advance under safeguards intended to prevent over-financing and the use of short-term loans for long-term purposes and to ensure increased supervision and a sound investment of reserve funds. Central banks, however, took no advantage of this sanction and generally preferred to aim at the reduction of their commitments. This has been attempted both by the repayment of some part of the loans and deposits falling due and by a reduction of interest charges. Depositors in the central banks have in many cases agreed to a reduction of the rates payable on their deposits, and it is calculated that these reductions have enabled the central banks to pass on a reduction of interest charges to societies amounting to about Rs. 2·87 lakhs. Societies in turn have in many cases been able to offer still further concessions to members on full payment of their annual demand and some part of the arrear interests, the total effect of which is estimated to be about Rs. 12·5 lakhs. Government notice with satisfaction the attempt made by the Registrar to improve the efficiency of the Departmental activities by the organisation of audit circles and the increased control which he is prepared to exercise over the supervisors of such banks as are willing to place them under his direction.

3. During the year two land mortgage banks were established (at Jessore and Birbhum), bringing up the total to the five mentioned in the last year's resolution. Disappointment has been expressed at the slowness of the progress made by these banks, and the cultivators' response to the facilities offered by them has been surprisingly hesitant. Up to the end of June 1935, applications received averaged for each bank only about two for every three days of the bank's working. There had been 1,599 applications for loans aggregating Rs. 3·99 lakhs, of which 962 had not been examined. Of the remainder 266 or 42 per cent. had been accepted for Rs. 1·04 lakhs; and 65 applicants had actually received Rs. 23,435, more than two-thirds of which was for the redemption of prior debt. Delay is at first inevitable and it is very desirable that progress should be slow and should be consolidated at every step. In Bengal the problems created by the slump in land values and the reduction of the debtor's capacity to repay are enhanced by problems peculiar to the province arising from the existence of co-sharers amongst both the tenants and the landlords and from the provisions of the tenancy law. A very detailed and often laborious enquiry is necessary into title and encumbrances, and it is very desirable to effect such scaling down of debts as can be amicably arranged with the existing creditors. Government note with satisfaction the measure of success achieved in scaling down the debts of applicants to whom loans have been issued in Mymensingh and Pabna. The issue of

debentures to finance the advances made by the banks has not yet been possible pending investigation by the law officers of Government of certain connected legal problems; but there has hitherto been no difficulty in obtaining from the Provincial Co-operative Bank the finance necessary for the loans advanced up to the present. The banks already established are experimental and if, as Government hope, they prove to be sound financially and an effective means of freeing the agricultural population from its burden of debt, further land mortgage banks will be gradually opened throughout the province.

4 Government note with pleasure the report that the non-agricultural credit organisations have maintained a satisfactory position in spite of decreases in loans issued and repayments made and an increase of overdues. Government also notice with satisfaction the report of good work done by relief, rural reconstruction and house-building societies, the satisfactory start made by the Malda Co-operative Sugar Mill, the prospects of success in the later developments of the Badarkhali colonisation scheme and the partial success of artisan and fishermen's societies. They are convinced of the utility of these and other forms of non-credit organisations for which there is considerable scope

5. During the year Government received a report by Mr. M. L. Darling, C.I.E., I.C.S., an officer of the Government of India, deputed to enquire into the condition of the co-operative movement in Bengal. As a result of his recommendations Government decided to strengthen the movement by the appointment of an I.C S. officer as Joint Secretary to Government in this department whose duties are to concentrate on the work of the co-operative department and to advise on questions of policy and by the appointment of a more junior I C.S. officer as Deputy Registrar. Effect has been given to this decision since the close of the co-operative year 1934-35, and further action has also been taken upon recommendations in Mr. Darling's report which will fall to be commented upon next year.

6. The thanks of Government (Ministry of Agriculture) are due to Khan Bahadur A M. Arshadali for his administration of the department during yet another year of stress. The Minister in charge also acknowledges with pleasure the assistance rendered to the movement by the various district, subdivisional and other officers named by the Registrar and by the non-official workers connected with it and places on record his satisfaction with the good work done by departmental officers mentioned by the Registrar.

Admission.—There will be two classes of students—

(*i*) casual students, and
(*ii*) regular students.

(*i*) The casual students shall generally be students, who, along with their studies in the College classes at Rajshahi or elsewhere, join the Institute for such vocational training as may be available—practical and theoretical—as casual students.

(*ii*) Regular students will be those who are solely and whole-time students of the Agricultural Institute.

In the case of regular students admissions shall ordinarily be open to (*i*) Matriculates, and to (*ii*) those who have read up to the end of the second year's course of the I.Sc. standard, or equivalent or higher standard with Science subjects. The Matriculates will have to follow a four years' course unless the Superintendent of the Institute is of opinion that it is possible for such students to complete the course earlier.

Those who have read up to the second year's course of the I.Sc. standard or equivalent or higher standard with Science subjects will have only a two years' course of training.

Applications for admission will be received by the Superintendent of the Institute up to the 15th of July or such other date as the Superintendent may fix for this purpose. The normal qualification for admission shall be a

pass certificate in the Matriculation Examination of any Indian University but candidates who have passed the above examination from either the Calcutta University or Dacca Board of Intermediate and Secondary Education shall have preference. Preference shall also be given to candidates from the Rajshahi Division, provided they satisfy the requirements for admission. Should suitable Matriculates be not available others can be considered but these will be required to pass an admission test of a similar or suitable standard.

Applicants must apply through the Headmaster of the School last attended by them, who would testify as to their age, educational qualification, character and physique. Applications should be accompanied by two certificates of moral character and physical fitness. The age of the candidate at the time of application should be between 15 and 19 years.

Period of study.—The course of study shall be spread over the following period:—

For Matriculates or for those who have not read up to the end of second year I.Sc. course—

Third year.—Horticulture, Dairy, Poultry, Agricultural Farming.
Fourth year.—Horticulture, Dairy, Cigar-making.

In the first and second years provision shall be made for some suitable practical field work either in poultry or in dairy or in cultivation of crops or in agricultural farming. Classes shall begin in the first week of August every year.

Certificate.—At the completion of the course an examination test, both theoretical and practical, shall be held by a Board consisting of the Director of Public Instruction and the Director of Agriculture, Bengal, with such other persons as they nominate on this behalf, and students coming out successful shall be given certificates.

Discipline.—On admission, the students shall be required to give an undertaking to the effect that they will obey the rules of the Institute, observe discipline and respect the instruction of the authorities of the Institute. Any student not satisfying as to progress made at the end of the first year shall be liable to stay in the first year course of study again. Any student is liable to expulsion for misbehaviour and the power to so expel a student will lie with the Board of Management of the Institute hereinafter mentioned.

Control and staff.—The Institute shall be under the control and administrative authority of the Principal of the Rajshahi College subject to such directions, instructions and rules as may be framed by the Board of Management subject to the approval of Government or the Director of Public Instruction.

The staff of the Institute will consist of a Superintendent assisted by lecturers.

The first staff of the Institute shall be appointed by Government on the recommendation of an expert Board, which shall be appointed for this purpose, provided that at any later stage such appointments shall be made by Government on the recommendation of the Board of Management.

Charges.—A regular student will have to pay a fee of Rs. 3 per month while a casual student will only pay a fee of Re. 1 per month. These rates may be varied by the Board of Management with the approval of Government. There will be no admission fee, but the Board of Management reserve the right to levy admission fee which shall not exceed the rate of monthly tuition fee for regular students with effect from any session they deem fit.

Each student will be required to deposit a sum of Rs. 5 as caution money at the time of admission which will be refunded on his leaving the Institute, less the cost of breakages. The rules governing the realisation and refund of, and deduction from, the caution money deposits from the pupils of the Government colleges shall *ipso facto* apply to the pupils of the Basanta Kumar Agricultural Institute.

Notwithstanding the above rule, the unclaimed caution money deposits shall be deposited to the Reserve Fund of the Institute and not in the Treasury as in the case of Government Institutions.

All regular students shall ordinarily reside in the hostel provided, for which a special seat-rent shall be charged. The students will manage their own mess under the guidance and general control of the Superintendent of the hostel.

No. 2147M.—11th May 1936.—In exercise of the power conferred by section 32 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885) as modified up to 1st September 1933, I sanction the following rules of business framed by the Malda local board in the district of Malda:—

Rules under section 32 of the Act framed by the Malda Local Board.

Clause (A).

The time and place of its meetings, the business is to be transacted at meetings, and the manner in which notices of meetings shall be given.

Rule 1. If the Chairman is temporarily absent from his duties, or if the office of the Chairman is temporarily vacant the duties of the Chairman under these rules shall be performed by the Vice-Chairman.

Rule 2. Meetings shall be either ordinary or special.

Rule 3. An ordinary meeting of the local board shall be held on such day of every month as may be fixed from time to time by the board at a meeting, provided there is business to be transacted. Provided also that if in any month there is not enough business to make a meeting necessary no meeting shall be held in that month.

Rule 4. A special meeting of the local board may be called at any time by the Chairman. The Vice-Chairman shall be bound to call a special meeting on a requisition signed by not less than one-fourth of the total number of the members.

Rule 5. All subjects which come within the province of the local board may be dealt with at either ordinary or special meetings, provided there be necessary quorum

Rule 6. Meetings shall be held at the meeting room of the district board or at such place as the Chairman may from time to time determine.

Rule 7. The notice under rule 67 of the General Rules shall be sent by post or by such other method as may be convenient, provided that if a local newspaper be published at the headquarters of the local board, the board by a resolution duly passed, may decide that the publication of such notice in the newspaper in question shall be sufficient.

Rule 8. Notice of motions and amendments accompanied by *verbatim* drafts signed by the proposer shall be sent to the Chairman or in the case of there being a Secretary, to the Secretary, so as to reach him in case of motions at least fifteen days and in case of amendments at least two days before the date of the next meeting. Notice received too late shall be inserted in the list of business of the next succeeding meeting, provided that the Chairman may, in his discretion, admit any motion or amendment at a shorter notice.

Rule 9. A member who wishes to ask a question at a meeting for the purpose of obtaining information relating to the affairs of the board shall give notice of his intention to the Chairman at least fifteen days before the day of a meeting and shall together with the notice submit a copy of the *verbatim* draft of the question he wishes to ask, provided that no single member shall be allowed to ask more than three questions in any one meeting.

On the day of the meeting and before other business commences the Chairman may at his discretion read out his answer, if any, or lay a written copy of his answer on the table. No debate shall be allowed on any question.

Rule 10. A notice book shall be kept by the Chairman of the local board, in which all notices of motions shall be entered. All such notices shall be dated and numbered as received.

Adjourned meetings.

Rule 11. An adjourned meeting is not competent to transact any business save that which the original meeting left unfinished.

Rule 12. An adjourned meeting being merely a continuation of the original meeting does not require any fresh notice.

Clause (B).

Conduct of proceedings at meetings, etc.

Order of business.

Rule 13. At ordinary meeting the business shall be conducted in the following order:—

(*a*) The first half an hour of every meeting shall be available for the asking and answering of questions.

(*b*) The minutes of the last ordinary meeting and of any special meeting held since, shall be read and if approved as correctly entered, shall be signed by the Chairman of such meeting.

(*c*) Business postponed from the last ordinary meeting shall be considered.

(*d*) A progress report of works shall be laid before the board.

(*e*) Letters and reports of committee shall be read, and accounts and statements shall be considered and passed.

(*f*) Motions and amendments of which due notice has been given shall be discussed.

Rule 14. At a special meeting only the business for which the meeting was called shall be considered, provided that with the consent of the majority of the members present any other business may be considered.

Rule 15. In the event of any objection being raised to the manner in which any resolution has been recorded the Chairman shall decide the question after reference to the original draft of the resolution and if he finds the minute to be inaccurate, shall make the necessary correction in the minute book.

Rule 16. Unless with the consent of the majority of the members present at the meeting all subjects shall be discussed in the order in which they appear in the notice paper, provided that the Chairman may give precedence to the discussion of any subject appearing in the notice paper by reason of its importance and urgency.

Rule 17. Every motion and amendment duly moved shall be seconded and until seconded no debate thereon shall take place.

Rule 18. When any motion involving several points has been discussed it shall be in the discretion of the Chairman to split up the motion and put each or any point separately to the vote.

Rule 19. Every amendment shall be relevant to and within the scope of the proposal to which it relates and shall be so worded as to be capable of making an intelligible sentence either alone or in its proper place in an original motion as the case may be, provided that no amendment shall be moved which merely negatives the original motion, provided also that an amendment on a question shall not be inconsistent with a previous decision on the same question given at the same stage of any motion.

Rule 20. The President of the meeting may, for reasons to be recorded in writing and entered in the minutes of the proceedings—

(*a*) rule that a motion or amendment or question is illegal or out of order, and

(*b*) make such alterations in a motion or amendment or question as shall, in his opinion, render it legal, or in order; and may in case (*a*) refuse to put amendment to the meeting or to answer the question and in case (*b*) refuse to put the amendment to the meeting unless and until the proposer and seconder accept and sign the alteration so made.

And the decision of the President shall be final.

Rule 21. On the discussion being concluded in the event of several amendments having been proposed, the President shall put the last amendment to the vote first; if it is negatived, he shall put the last preceding amendment; and lastly, the first amendment; and if all the amendments are lost, the original proposition shall be put to the vote.

Of the right to speak.

Rule 22. A member desiring to make any observation on any mater before the meeting shall speak from his place, shall rise when he speaks and shall address the President. If the President rises at any time any member speaking shall immediately resume his seat.

Rule 23. The member who first addresses the meeting shall be entitled to be heard first; and should more than one member rise to address the meeting at the same time, the order of precedence shall be determined by the President.

Rule 24. Any member shall be at liberty to call the attention of the President to a point of order, even when a member is speaking. On a point of order being raised, the member addressing the meeting shall resume his seat until the question has been decided by the President. After the decision of the President the same point of order cannot be raised again. Except as provided by this rule no member shall interrupt a speaker in possession of the meeting.

Rule 25. Except as provided in the last preceding rule no member shall speak except to move or second a motion or amendment or to support or oppose a motion or amendment which has been duly moved and seconded.

Rule 26. A speaker who has exhausted his right to speak on an original motion, may speak on any amendment being moved, as that raises a new question.

Rule 27. The mover of a motion or amendment shall in all cases have a right of reply, but otherwise no member shall speak more than once on the same motion or amendment, unless in explanation of some part of his original speech.

Miscellaneous.

Rule 28. Unless not less than two-thirds of the members of the board consent by signing a requisition, no subject once finally disposed of can be reconsidered within six months.

Rule 29. When any business, of which notice has not been given, is considered at a meeting, the decision recorded or resolution adopted at such meeting shall be of no effect unless and until it is confirmed at the next succeeding ordinary meeting, or at a special meeting called expressly for the purpose.

Rule 30. For the purpose of taking into consideration business involving many details the meeting may resolve itself into a committee of the whole body. When this has been determined on the rule prohibiting any person from speaking more than once shall be deemed suspended until the meeting resumes.

Rule 31. When a motion or amendment is put to the vote the President or the Secretary shall record against it, first the names of the members voting for it, and then the names of those voting against it.

Rule 32. Vote may be taken by voice or by show of hands, provided that if a poll be demanded by at least five members the votes of all members present who desire to vote shall be taken under the direction of the President. The result of the voting in either case shall be announced by the President and shall not be challenged. Voting by proxy shall be prohibited.

PART VI

Bills introduced in the Council of State and Legislative Assembly, Reports of Select Committees presented to the Council and Assembly, and Bills published under Rule 18 of the Indian Legislative Rules.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly on the 17th April 1936:—

L. A. BILL No. 22 OF 1936.

A Bill to amend the Indian Medical Council Act No. XXVII of 1933.

WHEREAS it is expedient to amend the Indian Medical Council Act No. XXVII of 1933; It is hereby enacted as follows:—

Preamble. Omit the word "Higher" in the preamble of the Act.

Short title, extent and commencement. **1.** This Act may be called the Indian Medical Council Amendment Act, 193 .

2. It extends to the whole of British India.

3. It shall come into force on such date as the Governor General in Council may, by notification in the Gazette of India, appoint.

Constitution and composition of the Council. In clause 3 (*1*) add new clause (*d*) as under:—

(*d*) One member from each province where a provincial register is maintained, to be elected from amongst themselves by persons enrolled in the Register.

Clause (*d*) of the old Act to be reconstituted as clause (*e*) and amended as under, if the latter provision in new clause (*d*) is not acceptable.

(*e*) Six members to be nominated by the Governor General in Council of whom three shall be License-holders and having been elected already by the All India Medical Licentiates' Association.

In the first schedule below Punjab University and as an additional item add:—

Medical Schools recognised by the Provincial Governments.	Medical Diplomas recognised by the Provincial Governments and the Provincial Medical Councils.

STATEMENT OF OBJECTS AND REASONS.

Ever since the Indian Medical Council Act of 1933 came into force, the discontent among that large and important class of Medical Men known as L. M. Ps. had become deeper and deeper. This state of affairs cannot be allowed to continue long.

(2) It is but right that the All India Medical Council should be seized with the problem of setting right the medical standards in this country and unless this Medical Council for India exercises its central control and authority over Medical Education in Medical Schools, as it does at present with that of the University Medical Colleges, the Provincial Governments who are in sole charge of Medicalschool education are not likely in near future to bestow the desired and much needed attention.

(3) It is unimaginable that a vast body of Medical Men who are entitled to practise by law and statute of the Provincial Governments and who are recognised by the Provincial Medical Council as legally qualified Medical Practitioners should be denied their ligitimate right of being included in the All India Medical Council.

(4) It is patent that if the Medical Council for India has to justify its title it must include within its scope the Medical Licentiates who form a preponderating majority of Medical Men with responsible official and public situations.

(5) It may be mentioned, the original intention as was proposed in the draft Bills previous to the passing of the Act in its final form, was to constitute a Medical Council in India in order to establish a uniform standard of qualifications in Medicine for all provinces, but that this laudable proposal was given up at the selfish behest of the General Medical Council.

It is therefore now proposed by the above amending Bill to make the Indian Medical Council Act No. XXVII of 1933 more comprehensive and equitable and make it acceptable to the Indian Medical profession. I strongly commend it for the favourable consideration of this Assembly.

ANUGRAH NARAYAN SINHA.

MD. RAFI,

Secy. to the Govt. of India.

The object of this Bill is to bring about a desirable change in the present constitution of the Committee of the Durgah Khawaja Saheb, Ajmer (formed under Notification No. 1811-A., dated the 1st June 1867, of the Honourable the Lieutenant-Governor of the North-Western Provinces under section 7 of Act XX of 1863 and printed at page 786 of the Ajmer Regulations, Volume M to P), by reducing the term of office of the members from life to five years and increasing the number of independent Muslim members in the Committee so as to provide for popular and effective control over the Durgah Hazrat Khawaja Moinud-din Chisti and the Endowments attached thereto, which have hitherto remained almost exclusively in the hands of persons themselves financially interested in the institution as attendants, servants or representatives of the office-holders of the shrine, and further to ensure the proper collection of income, disbursement of expenditure, maintenance and publication of the accounts and observance of discipline in the Durgah.

These changes cannot be brought about except by express legislation.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 11th May 1936.

Third and Final Forecast of the Spring Oilseed Crops of Bengal, 1935-36.

(*Note.*—On an average of the five years ending 1933-34, the area under linseed in Bengal has represented some 3·5 per cent. and that under rape and mustard 11·3 per cent. of the total area under these crops in British India.)

Character of the season.—After the issue of the second forecast continued drought caused damage to the crops in parts of West and North Bengal, but conditions were favourable elsewhere notably in the districts of Mymensingh and Faridpur resulting in a slight increase in outturn. On the whole a fair crop was reaped for the province.

Area sown.—Oilseeds are chiefly grown in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions the cultivation is not extensive. The total area under these crops (excepting sesamum for which separate forecasts are issued) is returned at 850,400 as against 892,100 acres last year.

Outturn.—From the District Officers' estimates the provincial outturn of the different oilseed crops works out at 76 per cent. as against 87 per cent. last year.

Taking 7 3/8ths maunds as the normal yield per acre for linseed, 7 3/5ths maunds for rape and mustard and 4½ maunds for other oilseeds, the total yield of the crops for the province is estimated at 176,700 tons this year as against 212,200 tons last year.

DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 12th May 1936.

Final Forecast of the Wheat Crop of Bengal, 1935-36.

(*Note.*—On an average of the five years ending 1933-34, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage total wheat acreage in (*a*) British India and (*b*) in the territory now reported on has, in the five years ending 1933-34, averaged (*a*) 41·1 and (*b*) 10·4 per cent., respectively.)

Character of the season.—At the outset the weather was generally unfavourable owing to drought. Since the issue of the third forecast in April last the conditions have practically remained unchanged. A satisfactory outturn is expected in the districts of Dinajpur, Darjeeling, Rangpur and Faridpur.

Acreage.—According to District Officers' estimates, the total area sown is 127,100 acres this year as against 154,700 acres last year.

Outturn.—The provincial outturn as worked out from the district estimate is 70 per cent. of the normal as against 90 per cent. last year. Taking the normal yield to be 10 maunds per acre, the gross yield of the crop for the province is estimated at 32,700 tons this year as against 51,100 tons last year.

At the end of April the wholesale price of wheat in the Calcutta mart was Rs. 3-7-0 annas per maund or about 6 per cent. higher than the price ruling at the corresponding period of last year. The price of common rice at Calcutta was Rs. 4-8-0 per maund against the same rate last year.

(2) The Revising Authority shall serve, on each of the persons affected by the application, a notice specifying the correction which it is proposed to make in the roll and the place where and the time when objections to the proposed correction will be heard:

Provided that no such notice shall be served where the Revising Authority is *primâ facie* satisfied that the application for correction should be granted or where the application is one for the correction of a clerical or printing error.

Except in the case where the Revising Authority is *primâ facie* satisfied as to the validity of a claim, every person whose claim or objection is received in time shall be served with a notice in form IV by the Revising Authority specifying the place where and the time when his claim or objection will be heard, and directing him or his agent to be present with such evidence as he may wish to adduce.

20. When objection is made by any person to the inclusion of the name of any other person recorded therein, the Revising Authority shall, except in the case where such authority is *primâ facie* satisfied as to the validity of the objection, serve on such other person a notice in form V annexed to these rules, giving the grounds on which the inclusion of his name has been objected to, and requiring such person or the agent of such person to attend at the place and time fixed for the hearing of the objection. Notice of objections when to be given.

21. Every notice issued by the Revising Authority shall, if possible, be served personally, and in default of personal service, shall be served by registered post or by affixing a copy thereof at the residence within the constituency of the person concerned. A certificate of service, either personal or otherwise, shall be deemed to be conclusive proof of the fact of such service. Service of notice.

22. At the time fixed for the hearing, the Revising Authority shall hold a summary inquiry into the claim or objection preferred, and shall record his decision. He shall also, after considering any verbal or written objections that may be preferred, decide on any application made by the Registering Authority for corrections to the roll. For the purpose of the inquiry the roll as published under rule 14 shall be presumed to be correct and complete until the contrary has been proved. No party shall be represented by any legal practitioner at any proceeding under this rule. Inquiry into claims and objections by the Revising Authority.

23. The orders made by the Revising Authority shall be final and he shall communicate his decision to the Registering Authority and to the agent, if any, employed under rule 10, and such Registering Authority or agent shall cause the roll to be altered in accordance therewith. The Revising Authority shall also direct the Registering Authority, and such agent, if any, to correct any clerical or printing errors which he may himself discover in the roll. Decision of the Revising Authority regarding claims and objections.

24. (1) The electoral roll so altered shall be republished in the manner specified in rule 14 and shall come into force from the date of such republication and shall remain in force for a period of three years after which a fresh roll shall be prepared: Final publication of electoral rolls.

Provided that the Governor may, by notification in the Gazette, direct the preparation in accordance with these rules of a fresh roll at any time before the expiration of the said period.

(2) If a constituency is called upon to elect a member or members after an electoral roll has ceased to have force and before the completion of the new electoral roll, the old electoral roll shall for the purposes of that election continue to operate as the electoral roll for the constituency.

(3) Provision may be made for the sale of copies of the roll to the public.

Amendments to electoral rolls.

25. (1) Notwithstanding anything contained in these rules any person may apply to the Registering Authority for the constituency concerned for the amendment of any electoral roll for the time being in force, and the Registering Authority on receipt of such application shall forward it to the Governor. The Governor may, at any time after any such application has been received in respect of an electoral roll, by notification in the Gazette, direct the preparation of a list of amendments thereto, and all the provisions of these rules shall apply in the case of every such list in like manner as they apply in the case of electoral rolls:

Provided that where any such application is made for the correction of an existing entry in the electoral roll and the Registering Authority is satisfied after personally hearing the applicant that the entry relates to the applicant and is erroneous or defective in any particular, he may amend the roll or cause it to be amended accordingly:

Provided further that where any such application is made for amendment of the electoral roll by the inclusion of the name of the applicant, the Registering Authority shall, on payment by the applicant of a fee of Rs. 10 make, subject to the general or special order of the Governor, such inquiry as he thinks fit and shall, if satisfied as to the validity of the applicant's claim, amend the roll or cause it to be amended accordingly.

(2) When any list of amendments has been republished under sub-rule (1), the electoral roll to which it relates shall be deemed to have been amended accordingly.

Part III—Custody and preservation of electoral rolls and other election papers connected therewith.

Custody and preservation of electoral rolls, etc.

26. (1) The papers mentioned in column 1 of Schedule II hereto annexed shall be kept in the custody mentioned in the second column thereof for the period specified in the third column thereof, unless their retention is otherwise ordered by competent authority.

(2) One complete copy of the final electoral roll of each constituency shall be forwarded by the Registering Authority of each constituency, to the Keeper of Records, Bengal, through the Reforms Office, for permanent deposit in the Secretariat Record Room.

(3) Copies of final electoral rolls referred to in entry 3 of Schedule II deposited under sub-rule (1) and copies of such rolls deposited under sub-rule (2) shall, before deposit, be duly authenticated by the Registering Authority.

(4) Printed copies of final electoral rolls in excess of the number required for permanent record shall be also deposited in the case of a constituency other than the Calcutta General (Urban) constituency in the office of the Registering Authority of the constituency and in the case of the Calcutta General (Urban) constituency in the office of the Commissioner, Presidency Division. Spare copies of electoral rolls so deposited shall be available for sale to the public for a period of three years from the date of publication after which they will be sold as waste paper under the orders of the authority with whom they are deposited.

CALCUTTA, THE 25TH MAY 1936.

RESOLUTION—No. 1723P.J.

The Governor in Council has had under consideration the extension of the system of the premature release of prisoners on the recommendation of the Advisory Boards appointed in Government (Revenue Department) resolution No. 2221, dated the 8th March 1924. In accordance with the terms of that resolution, the Boards consider the cases of non-habitual prisoners who have served a period of 2½ years including remissions and have completed two-thirds or more of their sentences. The Fourth All India Conference of Inspectors-General of Prisons, held in 1929, recommended that the cases of all casual convicts undergoing substantive sentences of 3 years and over should be considered by the Advisory Boards when the prisoners have completed 2 years' imprisonment, or half their sentences, whichever is greater, excluding the period of remission. The Governor in Council has decided to accept this recommendation, with the modification that the period of remission will be taken into account in fixing the point at which the review of sentences should be considered. In the case of old and infirm prisoners, the limit of 2 years' imprisonment, or half the sentence, may be reduced at the discretion of the Boards.

2. In resolution No. 2868P.J., dated the 7th August 1933, reference was made to cases in which a prisoner might not have served the prescribed portion of his sentence at the time of the meeting of the Board, but might be due for release before the next meeting. The Governor in Council has decided that cases of this nature should be considered, so that if a prisoner is found otherwise suitable for premature release, the Board may recommend his release on completion of 2 years' imprisonment, or half the sentence, as the case may be.

3. For the purpose of calculating the period of 2 years' imprisonment, or half the sentence, the Superintendent of the Jail will, when examining cases for submission to the Advisory Board, take into account the remission actually earned and ordinary remission likely to be earned before the meeting of the Board and for a period of 6 months thereafter. In fixing the date of release, the Superintendent will take into account the total remission earned including all special remission, but the remission must not exceed one-third of the period actually spent in jail.

4. Resolution No. 2868 P.J., dated the 7th August 1933, is hereby cancelled.

By order of the Governor in Council,

J. R. BLAIR,

24-Parganas.—No. 1979P.H.—25th May 1936.—In pursuance of rule 8 of rules for the preparation, publication and execution of projects for water-supply, sewerage or drainage by municipal authorities, it is hereby notified for general information that a joint scheme for the supply of water to the Baranagore and Kamarhati municipalities in the district of the 24-Parganas, has been approved by the Government of Bengal (Ministry of Public Health) and that the particulars of the said scheme are as follows:—

(*1*) (*a*) The joint scheme which is designed to supply 5 lakhs gallons of water per day to the Baranagore Municipality and 3 lakhs gallons of water per day to the Kamarhati Municipality, is divided into three sections as below:—

Section I—Baranagore Kamarhati joint head works.

Section II—Baranagore Distribution system.

Section III.—Kamarhati Distribution system.

The main delivery pipe from the joint pumping station will be divided into two pipes immediately outside the head works, one delivering water to Baranagore and the other to Kamarhati. Separate meters will be fixed on these two pipes just after the dividing point, the recording instruments being placed in a separate meter house. Should the meters or the recording instruments go out of order, the quantity of water supplied will be determined on the basis of the average of the meter reading or recording of the previous three months.

(*b*) The total estimated cost of the scheme (including the cost of the land acquisition) is Rs. 7,84,200 of which Rs. 5,08,600 will be borne by the Baranagore Municipality and the balance (Rs. 2,75,600) by the Kamarhati Municipality.

(*c*) The cost of maintenance of Section II will be met by the Baranagore municipality and that of Section III by the Kamarhati Municipality, while the maintenance cost of Section I will be borne by the two municipalities in proportion to the quantities of water supplied to their respective areas.

The total annual cost of maintenance of the scheme is at present estimated at Rs. 23,000 and assuming that the distribution of water between the Baranagore and Kamarhati municipalities will be maintained in the proportion of 5:3, Rs. 14,700 will represent the share of the Baranagore Municipality and Rs. 8,300 the share of the Kamarhati Municipality.

(*d*) The entire cost of the joint scheme will be met by loans from Government.

(*e*) and (*f*) The following statement shows the amount of loan, annual instalments by which the loan is repayable and the number of years required to repay it in respect of each municipality:—

	Amount of loan.	Amount of each annual instalment	Number of years required to repay the loan.
	Rs.	Rs.	
Baranagore	5,08,600	36,500	20
Kamarhati	2,75,600	19,832	20

(*2*) (*a*) The total annual charge of Rs. 79,332 to be incurred by reason of the water-supply is to be met by water rate.

(*b*) In the Baranagore Municipality the water rate is to be levied at 6 per cent. and in the Kamarhati Municipality at 7 per cent.

(*c*) The average incidence of such water rate per head of the population in the Baranagore Municipality will be Rs. 1;5 and that in the Kamarhati Rs. 75.

2. The joint scheme will be taken into consideration on or after the 26th June 1936, and any objection or suggestion with regard thereto, which may be received by the undersigned before that date, will be duly considered.

RESOLUTION.

Simla, the 16th May 1936.

Rules for the examination of candidates for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service.

No. F. 13 (3)-Ref./36.—In supersession of this department resolution No. F. 15 (6)-Ex. I/35, dated the 13th of April 1935, the following revised rules, which are liable to alteration from year to year are prescribed for the examination to be held in November 1936, for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service.

1. A competitive examination for admission to the Indian Audit and Accounts Service, the Imperial Customs Service, the Military Accounts Department and the Indian Railway Accounts Service, shall be held in India at such time as the Governor-General in Council may direct.

2. The maximum number of candidates to be admitted to the examination may, at the discretion of the Governor-General in Council, be limited to such number, not being less than 200, as the Governor-General in Council may decide. If the number of candidates exceeds that limit, the Public Service Commission shall select from among the applicants those who shall be admitted to the examination and in doing so shall have regard to the suitability of the applicants and to the adequate representation of the various provinces and communities of India.

3. (*i*) A candidate who is in the permanent service of the Government shall apply to the Public Service Commission for admission to the examination through the head of his office, who shall forward his application to the commission through the Government concerned unless he refuses his consent to the application.

(*ii*) A candidate who is not in Government service or is employed in Government service only in a temporary capacity at the time that he submits his application, shall apply to the Public Service Commission through the proper authority of the area in which his parents reside at the time of submitting his application, or have resided for a period of not less than three years, or in which the candidate has himself resided, otherwise than as a student, for a like period. A Government servant who is employed in a temporary capacity should, however, before submitting his application, obtain in writing the permission of the Head of the Office or Department in which he is employed and attach it to the application.

(*iii*) The proper authority for a Governor's Province shall be the Local Government of that Province; for Coorg, Delhi, Ajmer-Merwara, or British Baluchistan, the Chief Commissioner: and for a State in India the Political Officer or Agent who must be addressed through the Government of the State.

(*iv*) No candidate may make more than one application in respect of any one occasion on which an examination is held.

4. A candidate must be a male and either:—

(*a*) a British subject of Indian domicile whose father (if alive) is a British subject or a subject of a State in India, or (if dead) was at the time of his death either a British subject or a subject of a State in India or a person in the permanent service of the Crown or a person who had retired from that Service; or

(*b*) a ruler or a subject of a State in India:

Provided that in the case of a male British subject the requirements of this rule may be waived by Government if satisfied that their observance would occasion exceptiontal hardship, and that the candidate is so closely connected by ancestry or upbringing with His Majesty's Dominions as to justify special treatment.

Provided also that a ruler or a subject of a State in India cannot be appointed unless he has obtained the declaration required under Section 96A of the Government of India Act

5. Candidates must have attained the age of 22, and must not have attained the age of 25, on the first day of August 1936.

Provided that a candidate who is over the age of 25 and under the age of 28 on that date may be admitted to the examination if he—

(*a*) holds substantively a permanent appointment in a Department or Office administratively connected with the Service which he seeks to enter or in an Office or Department subordinate thereto, and

(*b*) is recommended by the Head of his Department.

6. A candidate must satisfy the Public Service Commission that his character and antecedents are such as to make him suitable for appointment to the public service. No candidate who is in the employment of the Central or of a Local Government will be admitted to the examination, unless the Head of his Department reports that his character and attainments are satisfactory.

7. The decision of the Public Service Commission as to the eligibility or otherwise of a candidate for admission to the examination shall be final.

8. A candidate must be a graduate of one of the Universities enumerated in the first appendix to these rules or hold the Senior Diploma of the Mayo College, Ajmer.

Provided that, in exceptional cases, the Public Service Commission may, on the recommendation of the Central Government or a Local Government, treat as qualified a candidate who, though he has not any of the foregoing qualifications, has passed examinations conducted by other institutions of a standard which in the opinion of the Commission justifies his admission to the examination.

9. No candidate shall be admitted to the examination unless he holds a certificate of admission from the Public Service Commission.

10. No recommendations except those invited in the form of application will be taken into consideration. Any attempt on the part of a candidate to obtain support for his candidature by other means may disqualify him for admission.

11. Candidates must pay the following fees:—

A.—To the Public Service Commission—

(*i*) Rs. 7-8-0 with the application form.

(*ii*) Rs. 75-0-0 immediately on receipt of an admission certificate from the Public Service Commission.

No claim for a refund of these fees will be entertained.

Candidates are required to pay their medical fees in cash to the Medical Boards concerned at the time of their medical examination.

12. The examinations will be conducted by the Public Service Commission in the manner prescribed in the regulations in the second appendix.

13. (*a*) A list of competitors, in the order of proficiency as disclosed by the aggregate marks finally awarded to each competitor, shall be prepared by the Public Service Commission.
